

## Online Child Care Provider Monitoring and Inspections

The results of child care provider inspections are available on the Child Care Services website to assist families in making informed choices when choosing a child care provider. This site includes results from annual on-site monitoring inspections and results from substantiated complaint inspections. There will be three years of on-site monitoring reports and substantiated complaint inspections available for viewing if the Provider has been registered or licensed for that length of time.

If there appear to be inaccuracies with the report viewed, please contact your local [licensing specialist](#) for your region. Child Care Licensing will review this information and make a final determination regarding changes that may need to be made.

Start the process by clicking on the [searchable database link](#) to find a child care provider.

Once in the Searchable Database,

1. Search for a provider by type of provider, name, city, county or zip code;
  2. Click on the provider's name in order to enter the provider information page;
  3. At the bottom of the provider information page, click on *Inspection and Compliance Information* to find the latest inspection.
