Stakeholder Survey Summary

Northern Hills Alcohol and Drug Services dba Compass Point

Printed September 2020

Survey Respondents

The Division of Behavioral Health (DBH) recognizes the need for strong community collaboration at the local level between agencies accredited with the DBH and their local referral sources seeking services for clients. Accredited agencies are asked to share a stakeholder survey with local referral sources such as schools, healthcare providers, and other entities of their choosing. The Stakeholder Survey is intended to create a dialogue between referral sources and accredited agencies to encourage collaboration to best meet the needs of clients.

Impact of SUD Treatment Services

Impact of treatment services is measured by surveying client perception of the quality of services received including the following: general satisfaction with services, access to services, quality and appropriateness of services, outcome of services, and participation in treatment planning. Additionally, impacts are measured by improvements in social connectedness and overall functioning. Impact of treatment services is relevant because clients who feel empowered, motivated, have positive family relationships, and feel they have the ability to change may be more likely to have positive treatment outcomes.

The following information represents data from those clients who agreed or strongly agreed at the time of successful discharge.

Impact of Inpatient Treatment Services

Impact of treatment services is measured by surveying client perception of the quality of services received including the following: general satisfaction with services, access to services, quality and appropriateness of services, outcome of services, and participation in treatment planning. Additionally, impacts are measured by improvements in social connectedness and overall functioning. Impact of treatment services is relevant because clients who feel empowered, motivated, have positive family relationships, and feel they have the ability to change may be more likely to have positive treatment outcomes.

The following information represents data from those clients who agreed or strongly agreed at the time of successful discharge.

Impact of CBISA

Impact of treatment services is measured by surveying client perception of the quality of services received including the following: general satisfaction with services, access to services, quality and appropriateness of services, outcome of services, and participation in treatment planning. Additionally, impacts are measured by improvements in social connectedness and overall functioning. Impact of treatment services is relevant because clients who feel empowered, motivated, have positive family relationships, and feel they have the ability to change may be more likely to have positive treatment outcomes.

The following information represents data from those clients who agreed or strongly agreed at the time of successful discharge.
