Stakeholder Survey Summary
Lutheran Social Services
Fiscal Year 2020 (FY20) Program Activity

Survey Respondents

The Division of Behavioral Health (DBH) recognizes the need for strong community collaboration at the local level between agencies accredited with the DBH and their local referral sources seeking services for clients. Accredited agencies are asked to share a stakeholder survey with local referral sources such as schools, healthcare providers, and other entities of their choosing. The Stakeholder Survey is intended to create a dialogue between referral sources and accredited agencies to encourage collaboration to best meet the needs of clients.

Stakeholder Types

	FY17	FY18	FY19	FY20	FY21
Law Enforcement (Sheriff, Police Department, Highway Patrol)	-	0	3	0	
Court Staff- (UJS, State, Federal, Tribal, Judge, Attorney, DOC, Drug Court, Teen Court)	-	11	32	16	
Department of Social Services- State/Tribal (EA/CPS/Adult Services/Child Welfare)	-	0	0	0	
Medical (Doctor/Nurse/Hospital Social Worker/Psychiatric Nurse/Community Health)	-	0	0	0	
Treatment Agency (Mental Health/SUD/EAP/Therapist/Counselor/Case Manager)	-	0	1	0	
School (Administrator/Counselor/Teacher/Social Worker)	-	0	0	0

Undecided		0%	11%	6%	
Agree		100%	86%	94%	
Total Responses		11	36	16	

Stakeholder Survey Feedback

Please give examples to support your ratings in the above questions:

- *The telehealth options offered are very helpful to client that can't drive or with limited resources. Staff is very nice and friendly.*
- *Other than progress notes on clients. I have limited information on the quality of services being provided or the qualification of those providing services. I use this agency for telehealth services only. Most clients that I have referred seem to benefit from the services and outcomes have been good.*
- *Very responsive to needs.*
- *The majority of my referrals are for telehealth services. I would like to see more evening groups for the clients that are employed.*

What does this agency do well?

- *Communication and client centered*
- *Communicating progress of clients*
- *Communicate with probation*
- *Excellent communication*

What suggestions would you make for this agency to improve services?

- *Brookings needs more counselors*
- *Offer more times for groups*

- *I would like the agency to make more of an effort to reach out to clients when a referral is made. At times, it appears that some counselors are quick to reach out to the CSO to report they have been unable to reach the client; however I pick up the phone to call the probationer, and they report they have not had any contact from*
- *More staff in the Brookings Office*

Additional Information:

- *I appreciate the telehealth equipment that is offered from this agency. Which removes barriers for the clients. Written discharge summaries/certificates of completion should be provided to the CSO for all clients that complete programming.*

Program Outcomes for CBISA

CBISA is a cognitive behavioral approach to teach participants strategies to avoid substance misuse. The curriculum emphasizes skill-building activities to assist with cognitive, social, emotional, and coping skills development.

Outcome Tool Return Rate Information for CBISA

The Data and Outcomes Work Group members set a goal for all contracted agencies to meet or exceed a 60% outcome tool return rate.

CBISA Return Rates	FY17	FY18	FY19	FY20	FY21
Initial Outcome Tool Return Rate					
# of Admissions	113	74	120	205	
# of Tools Submitted	24	62	120	201	
Return Rate	21%	84%	100%	98%

Number/Percent of Clients with a Primary Other Use Disorder	-	2 3%	5 4%	13 6%	

Targeted Services for Justice-Involved Adults

Impact of CBISA

Impact of treatment services is measured by surveying client perception of the quality of services received including the following: general satisfaction with services, access to services, quality and appropriateness of services, outcome of services, and participation in treatment planning. Additionally, impacts are measured by improvements in social connectedness and overall functioning. Impact of treatment services is relevant because clients who feel empowered, motivated, have positive family relationships, and feel they have the ability to change may be more likely to have positive treatment outcomes.

The following information represents data from those clients who agreed or strongly agreed at the time of successful discharge.

General Satisfaction with Services: Overall satisfaction with treatment services received

CBISA	FY17	FY18	FY19	FY20	FY21
Agency Average	100%	100%	100%	98%	
State Average	93%	95%	94%	96%	

Access to Services: Perception of the ease and convenience of treatment services received

State Average					
Admission	-	84%	84%	84%	
Discharge	93%	95%	95%	95%	

Utilization of High Cost Services for CBISA

High cost services include the following: treatment for illness, injury, or surgery, emergency department visits, hospital admissions for mental health care, detoxification services, inpatient substance use disorder treatment services, or detention in a correctional facility. Participation in treatment services may help reduce the frequency of client utilization of high cost services. Data from FY17 and June through December FY18 are not reported due to a change in the reporting process. The following section includes data at admission into services and at successful discharge from services.

Illness, Injury, or Surgery: Clients who reported night(s) spent in a facility for illness, injury, or surgery within 30 days of...

Program Outcomes for MRT

MRT combines education, group and individual activities, and structured exercises to assist participants in addressing negative thought and behavior patterns. The program promotes higher moral reasoning by increasing self-image and promoting a productive identity. MRT includes 12 steps focusing on issues such as honesty, trust, acceptance, healing, relationships, and setting goals.

Outcome Tool Return Rate Information for MRT

The Data and Outcomes Work Group members set a goal for all contracted agencies to meet or exceed a 60% outcome tool return rate.

MRT Return Rates	FY17	FY18	FY19	FY20	FY21

Targeted Services for Justice-Involved Adults

Impact of MRT

Impact of treatment services is measured by surveying client perception of the quality of services received including the following: general satisfaction with services, access to services, quality and appropriateness of services, outcome of services, and participation in treatment planning. Additionally, impacts are measured by improvements in social connectedness and overall functioning. Impact of treatment services is relevant because clients who feel empowered, motivated, have positive family relationships, and feel they have the ability to change may be more likely to have positive treatment outcomes.

The following information represents data from those clients who agreed or strongly agreed at the time of successful discharge.

General Satisfaction with Services: Overall satisfaction with treatment services received

MRT	FY17	FY18	FY19	FY20	FY21
Agency Average	95%	94%	93%	97%	
State Average	88%	96%	93%	96%	

Access to Services: Perception of the ease and convenience of treatment services received

MRT	FY17	FY18	FY19	FY20	FY21
Agency Average	96%	86%	95%	95%	
State Average	89%	92%	93%	93%

TCU Criminal Thinking Sub-Scales from Pre-Test to Post-Test

The TCU Criminal Thinking Sub-Scales is the tool used at admission into and at discharge from MRT treatment services. The sub-scales were developed to assess cognitive functioning expected to be related to criminal conduct. A reduction in any of the six sub-scales from pre-test to post-test may indicate a reduction in criminal thinking.

Entitlement: Sense of ownership and privilege, misidentifying wants as needs

MRT	FY17	FY18	FY19	FY20	FY21
Agency Average

Targeted Services for Justice-Involved Adults

Utilization of High Cost Services for MRT

High cost services include the following: treatment for illness, injury, or surgery, emergency department visits, hospital admissions for mental health care, detoxification services, inpatient substance use disorder treatment services, or detention in a correctional facility. Participation in treatment services may help reduce the frequency of client utilization of high cost services. Data from FY17 and June through December FY18 are not reported due to a change in the reporting process. The following section includes data at admission into services and at successful discharge from services.

Illness, Injury, or Surgery: Clients who reported night(s) spent in a facility for illness, injury, or surgery within 30 days of...

Targeted Services for Justice-Involved Youth Profile Lutheran Social Services

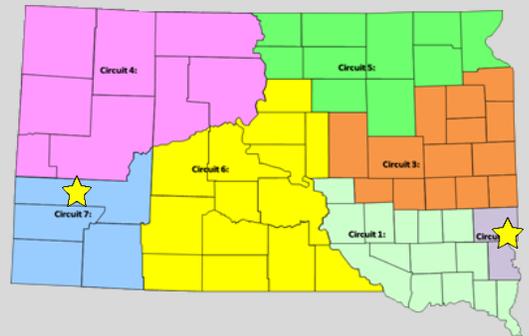

Printed September 2020

Fiscal Year 2020 (FY20) Program Activity

Targeted services for justice-involved youth were established in 2015 by Senate Bill 73. The Department of Social Services (DSS) worked with the Department of Corrections (DOC) and the Unified Judicial System (UJS) to identify and implement community-based treatment services for justice-involved and at-risk youth. Those services include Functional Family Therapy (FFT), Aggression Replacement Training (ART), and Moral Reconciliation Therapy (MRT). As of FY19, substance use disorder services are also available.

Lutheran Social Services provides FFT, ART, and MRT services to justice-involved youth. FFT services are provided to youth residing in the following counties: Brookings, Butte, Custer, Davison, Fall River, Lawrence, Lincoln, Meade, Minnehaha, Oglala Lakota, and Pennington. ART, MRT, and CYT services are provided to youth residing in Lincoln, Minnehaha, and Pennington Counties. Lutheran Social Services also provides ART, MRT, and CBISA Telehealth services which are available statewide.

This profile page reflects publicly funded clients in FY20, which runs from June 2019-May 2020.

Demographic Information

The demographic information includes clients funded through state and federal funds, including Medicaid.

Targeted Services for Justice-Involved Youth

Program Outcomes for FFT

FFT is a family-based therapy that focuses on building skills to improve family relationships, reduce behavioral issues and improve school performance. FFT is a clinical model that increases a family's motivation to change and tailors interventions to each family's unique risk and protective factors.

Outcome Tool Return Rate Information for FFT

The Data and Outcomes Work Group members set a goal for all contracted agencies to meet or exceed a 60% outcome tool return rate.

Impact of FFT

Impact of treatment services is measured by surveying youth perception of the quality of services received including the following: general satisfaction with services, access to services, cultural sensitivity, outcome of services, and participation in treatment planning. Additionally, impacts are measured by improvements in social connectedness and overall functioning. Impact of treatment services is relevant because youth who feel empowered, motivated, have positive family relationships, and feel they have the ability to change may be more likely to have positive treatment outcomes.

The following information represents data from those youth who agreed or strongly agreed at the time of successful discharge.

General Satisfaction with Services: Overall satisfaction with treatment services received

ART Treatment Services

Targeted Services for Justice-Involved Youth

Program Outcomes for ART

ART is designed to alter behaviors of chronically aggressive youth by using guided group discussions to correct anti-social thinking. ART uses repetitive learning techniques to teach coping skills for managing anger and impulsiveness. ART includes three interventions; social skills, anger control, and moral reasoning.

Agency Average	-	54%	74%	60%	
State Average	-	75%	77%	64%	

Impact of ART

Impact of treatment services is measured by surveying youth perception of the quality of services received including the following: general satisfaction with services, access to services, cultural sensitivity, outcome of services, and participation in treatment planning. Additionally, impacts are measured by improvements in social connectedness and overall functioning. Impact of treatment services is relevant because youth who feel empowered, motivated, have positive family relationships, and feel they have the ability to change may be more likely to have positive treatment outcomes.

The following information represents data from those youth who agreed or strongly agreed at the time of successful discharge.

General Satisfaction with Services: Overall satisfaction with treatment services received

Targeted Services for Justice-Involved Youth

Utilization of High Cost Services for ART

High cost services include the following: treatment for illness, injury, or surgery, emergency department visits, hospital admissions for mental health care, inpatient substance use disorder treatment services, or detention in a correctional facility. Participation in treatment services may help reduce the frequency of youth utilization of high cost services.

The following section includes data at admission into services and at successful discharge from services.

Illness, Injury, or Surgery: Youth who reported night(s) spent in a facility for illness, injury, or surgery within 6 months of...

Federally Required; Discharge data includes successful and unsuccessful discharges

AQ Sub-Scales for ART

The AQ is a brief measure to assess for anger and aggression including the following five scales: physical aggression, verbal aggression, anger, hostility, and indirect aggression. The AQ is completed at admission into services and at completion of services. The below data reflects the percentage of youth who improved in each domain.

Physical Aggression: Physical force when expressing anger or aggression

ART	FY17	FY18	FY19	FY20	FY21
Agency Average					
Percent Improved	-	56%	71%	75%	
State Average					
Percent Improved	-	63%	70%	60%	

Verbal Aggression: Quarrelsome and hostile speech

ART	FY17	FY18	FY19	FY20	FY21
Agency Average					
Percent Improved	-	56%	46%	71%	
State Average					
Percent Improved	-	60%	53%	66%	

Targeted Services for Justice-Involved Youth

Anger: Aspects of anger related to arousal and sense of control

ART	FY17	FY18	FY19	FY20	FY21
Agency Average					
Percent Improved	-	71%	65%	67%	
State Average					
Percent Improved	-	68%	57%	63%

Agency Average					
Percent Improved	-	53%	68%	89%	
State Average					
Percent Improved	-	62%	67%	76%	

HIT Sub-Scales for ART

The HIT measures four categories of self-serving cognitive distortions including the following: self-centered, blaming others, minimizing/mislabeling, and assuming the worst. The questionnaire is useful in assessment, treatment planning, tracking therapeutic progress, and individual or program level outcome evaluation. The HIT is completed at admission into services and at completion of services. The below data reflects the percentage of youth who improved in each domain.

Overall: Derived from all eight of the sub scores that make up the overt and covert scales

ART	FY17	FY18	FY19	FY20	FY21

Impact of ART

Impact of treatment services is measured by surveying parent/guardian perception of the quality of services received including the following: general satisfaction with services, access to services, cultural sensitivity, outcome of services, and participation in treatment planning. Additionally, impacts are measured by improvements in social connectedness and overall functioning.

The following information represents data from those parents/guardians who agreed or strongly agreed at the time of successful discharge.

General Satisfaction with Services: Parents/Guardians who reported overall satisfaction with treatment services their youth received

ART	FY17	FY18	FY19	FY20	FY21

Targeted Services for Justice-Involved Youth

Impact of MRT

Impact of treatment services is measured by surveying youth perception of the quality of services received including the following: general satisfaction with services, access to services, cultural sensitivity, outcome of services, and participation in treatment planning. Additionally, impacts are measured by improvements in social connectedness and overall functioning. Impact of treatment services is relevant because youth who feel empowered, motivated, have positive family relationships, and feel they have the ability to change may be more likely to have positive treatment outcomes.

The following information represents data from those youth who agreed or strongly agreed at the time of successful discharge.

General Satisfaction with Services: Overall satisfaction with treatment services received

MRT	FY17	FY18	FY19	FY20	FY21
Agency Average	-	100%	93%	91%	
State Average	-	100%	94%	92%

Targeted Services for Justice-Involved Youth

HIT Sub-Scales for MRT

The HIT measures four categories of self-serving cognitive distortions including the following: self-centered, blaming others, minimizing/mislabeling, and assuming the worst. The questionnaire is useful in assessment, treatment planning, tracking therapeutic progress, and individual or program level outcome evaluation. The HIT is completed at admission into services and at completion of services. The below data reflects the percentage of youth who improved in each domain.

Overall: Derived from all eight of the sub scores that make up the overt and covert scales

MRT	FY17	FY18	FY19	FY20	FY21
Agency Average					
Percent Improved	-	72%	69%	42%	
State Average					
Percent Improved	-	74%	74%	62%	

Overt: Reflects behaviors that usually involve direct confrontation of a victim

Impact of MRT

Impact of treatment services is measured by surveying parent/guardian perception of the quality of services received including the following: general satisfaction with services, access to services, cultural sensitivity, outcome of services, and participation in treatment planning. Additionally, impacts are measured by improvements in social connectedness and overall functioning.

The following information represents data from those parents/guardians who agreed or strongly agreed at the time of successful discharge.

General Satisfaction with Services: Parents/Guardians who reported overall satisfaction with treatment services their youth received

Targeted Services for Justice-Involved Youth

Utilization of High Cost Services for MRT

High cost services include the following: treatment for illness, injury, or surgery, emergency department visits, hospital admissions for mental health care, inpatient substance use disorder treatment services, or detention in a correctional facility. Participation in treatment services may help reduce the frequency of youth utilization of high cost services.

The following section includes data at admission into services and at successful discharge from services.

Targeted Services for Justice-Involved Youth

Primary Diagnostic Information for CYT and CBISA

The DBH monitors data and outcomes for publicly funded behavioral health treatment services. The table below reflects information entered into STARS by contracted providers for publicly funded youth receiving SUD treatment services. This does not include individuals who received only an assessment or justice-involved youth.

Primary SUD Diagnosis	FY17	FY18	FY19	FY20	FY21
Number/Percent of Youth with a Primary Alcohol Use Disorder	-	-	-	12 22%	
Number/Percent of Youth with a Primary Cannabis Use Disorder	-	-	-	38 70%	
Number/Percent of Youth with a Primary Amphetamine Use	-	-	-	1 2%	
Number/Percent of Youth with a Primary Opioid Use Disorder	-	-	-	0 0%	
Number/Percent of Youth with a Primary Other Substance Use Disorder	-	-	-	3 6%	

Impact of CYT

Impact of treatment services is measured by surveying youth perception of the quality of services received including the following: general satisfaction with services, access to services, cultural sensitivity, outcome of services, and participation in treatment planning. Additionally, impacts are measured by improvements in social connectedness and overall functioning. Impact of treatment services is relevant because youth who feel empowered, motivated, have positive family relationships, and feel they have the ability to change may be more likely to have positive treatment outcomes.

The following information represents data from those youth who agreed or strongly agreed at the time of successful discharge.

General Satisfaction with Services: Overall satisfaction with treatment services received

CYT	FY17	FY18	FY19	FY20	FY21
Agency Average	-	-	-	-	

Access to Services: Perception of the ease and convenience of treatment services received

CBISA Services

[Page intentionally left blank]

Targeted Services for Justice-Involved Youth

Program Outcomes for CBISA

CBISA is a cognitive behavioral approach that teaches participants skills and strategies for avoiding substance use. It emphasizes skill-building activities to assist with cognitive, social, emotional and coping skills development. Participants identify risky situations and learn the skills to appropriately deal with those situations as they arise.

Outcome Tool Return Rate Information for CBISA

The Data and Outcomes Work Group members set a goal for all contracted agencies to meet or exceed a 60% outcome tool return rate.

Impact of CBISA

Impact of treatment services is measured by surveying youth perception of the quality of services received including the following: general satisfaction with services, access to services, cultural sensitivity, outcome of services, and participation in treatment planning. Additionally, impacts are measured by improvements in social connectedness and overall functioning. Impact of treatment services is relevant because youth who feel empowered, motivated, have positive family relationships, and feel they have the ability to change may be more likely to have positive treatment outcomes.

The following information represents data from those youth who agreed or strongly agreed at the time of successful discharge.

General Satisfaction with Services: Overall satisfaction with treatment services received
