Service Description

Prevention Services provide effective prevention programming in schools and communities to increase awareness of suicide prevention and the dangers of substance abuse.

Outpatient Treatment Services provide treatment services in a community setting to individuals diagnosed with substance use disorders. Outpatient Treatment Services are available for both adults and youth.

Day Treatment Services provide treatment services to adults diagnosed with substance use disorders in a structured, intensive treatment program that may include a residential component.

Low Intensity Residential Treatment Services provides residential, peer-orientated treatment programs for adults diagnosed with substance use disorders whose living situation or recovery environment is incompatible with recovery goals. The program provides substance use disorder counseling with case management services to prepare the client to live successfully in the community.

Inpatient Treatment Services for Adults and Psychiatric Residential Treatment Facilities for Adolescents provide residential treatment with medically monitored intensive treatment for severe substance use disorders.

Intensive Methamphetamine Treatment (IMIT) Services support treatment for adults with severe methamphetamine dependence. IMT services offer long-term treatment with multiple entry points into services to address each client's individualized needs

Detoxification Treatment Services are residential treatment services delivered by trained staff that provide 24-hour supervision, observation and support for adults who are intoxicated or experiencing withdrawal symptoms.
