

Parenting Education Demographic and Feedback Data Collection

Before Class/At The Time of First Class:

<https://www.surveymonkey.com/r/HFCLRV3>

After Class/At The Conclusion of Class:

<https://www.surveymonkey.com/r/HFWVSS9>

During the first day of classes caregivers will take the first survey.

Sites can choose to do the surveys by paper and entering the data later on, or having caregivers take the surveys via their phones or other electronics directly. If the latter, may suggest creating a QR code handout for caregivers to scan to assure the link is accurate and easy to access.

Caregivers directly entering their responses is optimal to maintain the integrity of data collection, however, it is understood this is not always practical.

On the last day of class at the conclusion of class they will take the After Class survey.

Data will only be utilized for trending and analysis and data will remain confidential.

The names of each participant will be removed when data is analyzed. The sole reason for utilizing the name is so that responses before and after class can be aligned.

Individual sites will not be able to access data for their sites for peer reviews or other data trending purposes, but this information can be pulled by Program Specialist upon request for a site's own data, please provide a two-week window of time for these requests. This data will also be pulled on a quarterly basis and is available if sought.

Start date for Survey Monkey data collection- Classes starting on or after October 1, 2023.

New Addition-

For people who start the class but do not complete the cycle, there is a survey available and at least one attempt to share the survey by paper or by link/QR Code with them should be done. See QR Code below for that survey for those who do not fully complete the class.
