

OEND

Overdose Education & Naloxone Distribution

OVERVIEW: Overdose Education & Naloxone Distribution (OEND) in South Dakota is the result of a partnership between the Department of Health and Department of Social Services to reduce harm and risk of life-threatening overdoses and opioid-related deaths. Led by the Office of Rural Health, the project aims to educate, train, and equip emergency medical service personnel and other first responders on the rising dangers of opioids, how to recognize an opioid overdose, and the use of NARCAN® (Naloxone HCl) Nasal Spray to reverse an overdose.

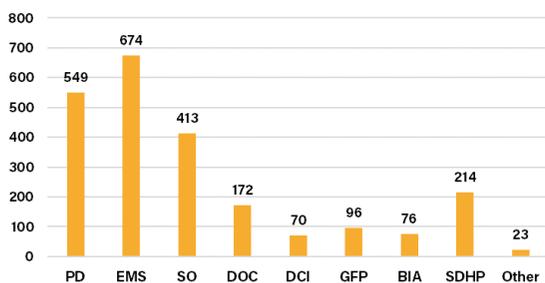

SINCE OCTOBER 2017...

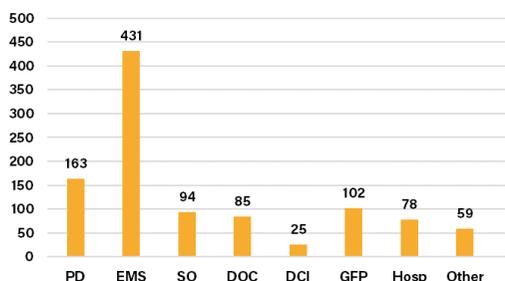

- 174 patients had an 'improved response' after at least one dose of NARCAN® from EMS personnel
- Over 2,200 NARCAN® kits have been distributed across South Dakota to individuals trained in OEND
- More than 1,000 first responders have been trained to recognize and respond to an opioid overdose

TRAINING & DISTRIBUTION NUMBERS

Naloxone Distributed

Personnel Trained

STRATEGIES

- Host regional, community-based trainings for Emergency Responders to receive education about recognizing and responding to a suspected opioid overdose.
- Provide emergency responders across South Dakota with NARCAN® (naloxone HCl) Nasal Spray, equipping them with life-saving medication to use for a suspected opioid overdose.
