Ziebach	7	7	100%
State Total	2916	5769	50.55%

WIC Recipients vs. Other Medicaid Children

- Statewide **53.65%** children under 15 months who are not enrolled in WIC receive more than 6 well child visits compared to **67.36%** of children under 15 months who are enrolled in WIC.

- Statewide only **33.07%** children between the age of 2-5 who are not enrolled in WIC received a well child visit in calendar year 2019 compared to **50.55%** of children between age 2-5 who are enrolled in WIC.

Data Considerations

- Data presented is from calendar year 2019.
- Data may not reflect the total number of well child visits at IHS and Tribal providers due to IHS billing on the encounter, data is limited by the code indicated by the provider on the claim.

Question: What are ways that IHS/Tribes/WIC/Medicaid can share data to accurately portray wellness visits for children in SD?

Partnership Opportunities

- Children eligible for WIC are more likely to get the recommended number of well child visits than their non eligible peers.
- Partnership with WIC has a significant benefit for children over age 2 and ensuring their health needs are being met.

Question: What are ways that IHS/Tribes/WIC/Medicaid can work together to ensure that children are getting 6+ visits prior to 15 months and annual visits between 2-5 years old?
