TN# 21-0007
South Dakota Medicaid will make payments to medical providers who sign agreements with the State under which the provider agrees: (a) to accept as payment in full the amounts paid in accordance with the payment structures of the State; (b) to keep such records as are necessary to fully disclose the extent of the services provided to individuals receiving assistance under the State Plan; and (c) to furnish the State Agency with such information, regarding any payments claimed by such person or institution for services provided under the State Plan, as the agency may request from time to time.

The following describes policy and methods the agency uses to establish payment rates for each type of care and service, other than inpatient hospital or nursing home services, included in the State Plan. In no instance will the amount of payment under the provisions of this attachment exceed the payment made by the general public for identical services.

1. **Inpatient Hospital Services** (See Attachment 4.19-A)

2a. **Outpatient Hospital Services**

   Effective August 2, 2016, Medicare Prospective Payment System hospitals will be paid using the Medicaid Agency’s Outpatient Prospective Payments System (OPPS). Under OPPS, services are reimbursed using Ambulatory Payment Classifications. Effective August 2, 2016, the Department will establish a conversion factor and discount factor specific to each hospital. The hospital specific conversion factor and discount factors are published on the State agency’s website at [http://dss.sd.gov/medicaid/providers/feeschedules/dss/](http://dss.sd.gov/medicaid/providers/feeschedules/dss/). Effective July 1, 2021, Medicare Prospective Payment System hospitals paid using the Medicaid Agency’s OPPS will be increased by 2.4 percent.

South Dakota Medicaid will pay remaining participating outpatient hospitals with more than 30 Medicaid inpatient discharges during the hospital’s fiscal year ending after June 30, 1993 and before July 1, 1994 on the basis of Medicare principles of reasonable reimbursement with the following exceptions:

1. Costs associated with certified registered nurse anesthetist services are allowable costs. These costs are identified on the CMS 2552-10 on Worksheet A-8 and included in the facilities’ costs.

2. All capital and education costs incurred for outpatient services are allowable costs. These costs are identified on the CMS 2552-10 on Worksheet D Part III and included in the facilities’ costs.

3. Payments to Indian Health Service outpatient hospitals will be per visit and based upon the approved rates published each year in the Federal Register by the Department of Health and Human Services, Indian Health Service, under the authority of sections 321(a) and 322(b) of the Public Health Service Act (42 U.S.C. 248 and 249(b)), Public Law 83-568 (42 U.S.C. 2001(a)), and the Indian Health Care Improvement Act (25 U.S.C. 1601 et seq.). The State agency will make payments for visits of the same type of service on the same day at the same provider location only if the services provided are different or if they have different diagnosis codes.
4. The agency will make prospective payments to outpatient hospitals based upon Medicare principles and the above exceptions using the CMS 2552-10 Report, Worksheet C, Part 1 lines 50-200 as submitted by the hospitals to determine the Medicare outpatient cost-to-charge ratios (CCRs) for the ancillary cost centers for each hospital. All participating hospitals must submit their Medicare cost reports to the agency within 150 days following the end of their fiscal year. For each hospital, the agency will use average of the ancillary CCRs for that hospital to calculate the hospital-specific reimbursement percentage to apply to outpatient charges from that hospital to determine the prospective Medicaid payment.

The remaining instate hospitals will be reimbursed at 90% of billed charges. Hospitals’ charges shall be uniform for all payers and may not exceed the usual and customary charges to private pay patients.

Reimbursement for outpatient services at out-of-state hospitals is calculated at 38.2% of the hospitals’ usual and customary charges.

Reimbursement for outpatient hospital dialysis units will be based on the applicable above-stated outpatient payment methodology.
2b. Rural Health Clinics

Payment for Rural Health Clinic (RHC) services conforms to Section 702 of the Benefits Improvement and Protection Act (BIPA) of 2000.

All covered Rural Health Clinic services furnished on or after January 1, 2001, and each succeeding fiscal year are reimbursed using a prospective payment system.

Until the State transitions to the prospective payment system on October 1, 2001, the State will reimburse RHCs based on the provisions contained in the State Plan as of December 31, 2000. Once the prospective payment system is in place, the State will retroactively reimburse RHCs to the effective date, January 1, 2001, according to the BIPA 2000 requirements.

Payment is set prospectively using the RHC’s reasonable costs of providing Medicaid-covered services during RHC Fiscal Years 1999 and 2000, adjusted for any increase or decrease in the scope of services furnished during RHC fiscal year 2001.

The baseline per visit rate is determined for each RHC by (1) calculating a per visit rate for RHC Fiscal Year 1999 and RHC Fiscal Year 2000, (2) adding the two rates together, and (3) dividing the sum by two. The RHC per visit rate is inflated forward from the endpoint of RHC Fiscal Year 1999 to the midpoint of State Fiscal Year 2001.

For newly qualified RHCs after Federal Fiscal Year 2000, the initial payments are determined by the statewide average per visit rate, updated each year using the Medicare Economic Index (MEI). A prospective rate for newly qualified RHCs shall be calculated after the provider has submitted a Medicaid cost report for two full years, according to the methodology described above.

Beginning in Federal Fiscal Year 2002 (October 1, 2001), and for each calendar year thereafter, the per visit payment rate is increased by the percentage increase in the MEI for primary care services, and adjusted for any increase or decrease in the scope of services furnished by the RHC.

The MEI will be applied January 1st of each year.

A change in the scope of services shall occur if: (1) the center has made a material change in services through the addition or deletion of any service that meets the definition of RHC services as provided in 1905(a)(2)(B) and 1905(a)(2)(c); and, (2) the service is included as a covered service under the Medicaid State Plan. A change in the scope of services is defined as adding a new service into the current per diem service base, or removing a service that is in the existing service base. A change in the cost of a service is not considered in and of itself a change in the scope of services.
The RHC will be responsible for notifying the Department at the time there is a change in the RHC’s scope of services. The RHC will supply the needed documentation to the Department for any adjustments in the rate resulting from any increases or decreases in the scope of services. The documentation must consist of two full years of Medicaid cost reports, and must be provided to the Department within 150 days from the RHC’s fiscal year end to be considered in the calculation of the adjusted rate. Upon the Department’s determination of a change in the scope of services, the effective date for the new rate will be 30 days after receipt of the Medicaid cost reports.

2c. Federal Qualified Health Centers

Payment for Federally Qualified Health Center (FQHC) services conforms to Section 702 of the Benefits Improvement and Protection Act (BIPA) of 2000.

All covered Federally Qualified Health Center services furnished on or after January 1, 2001, and each succeeding fiscal year are reimbursed using a prospective payment system.

Until the State transitions to the prospective payment system on October 1, 2001, the State will reimburse FQHCs based on the provisions contained in the State Plan as of December 31, 2000. Once the prospective payment system is in place, the State will retroactively reimburse FQHCs to the effective date, January 1, 2001, according to the BIPA 2000 requirements.

Payment is set prospectively using the FQHC’s reasonable costs of providing Medicaid-covered services during FQHC Fiscal Years 1999 and 2000, adjusted for any increase or decrease in the scope of services furnished during FQHC fiscal year 2001.

The baseline per visit rate is determined for each FQHC by (1) calculating a per visit rate for FQHC Fiscal Year 1999 and FQHC Fiscal Year 2000, (2) adding the two rates together, and (3) dividing the sum by two. The FQHC per visit rate is inflated forward from the endpoint of FQHC Fiscal Year 1999 to the midpoint of State Fiscal Year 2001.

For newly qualified FQHCs after Federal Fiscal Year 2000, the initial payments are determined by the statewide average per visit rate, updated each year using the Medicare Economic Index (MEI). A prospective rate shall be calculated after the provider has submitted a Medicaid cost report for two full FQHC fiscal years, according to the methodology described above.

If the newly qualified FQHC is a subsidiary of an entity that submits Medicaid consolidated cost reports, the newly qualified FQHC will receive that entity’s prospective payment rate. For these newly qualified FQHCs, the facility shall continue to receive the consolidated rates, updated each year using the MEI, unless the newly qualified FQHC has a material change in the scope of services provided. A prospective rate shall be calculated after the provider has submitted a Medicaid cost report for two full FQHC fiscal years, according to the methodology described above.
Beginning in Federal fiscal year 2002 (October 1, 2001), and for each calendar year thereafter, the per visit payment rate is increased by the percentage increase in the MEI for primary care services, and adjusted for any increase or decrease in the scope of services furnished by the FQHC.

The MEI will be applied January 1st of each year.

A change in the scope of services shall occur if: (1) the center has made a material change in services through the addition or deletion of any service that meets the definition of FQHC services as provided in 1905(a)(2)(B) and 1905(a)(2)(C); and, (2) the service is included as a covered service under the Medicaid State Plan. A change in the scope of services is defined as adding a new service into the current per diem service base, or removing a service that is in the existing service base. A change in the cost of a service is not considered in and of itself a change in the scope of services.

The FQHC will be responsible for notifying the Department at the time there is a change in the FQHC’s scope of services. The FQHC will supply the needed documentation to the Department for any adjustments in the rate resulting from any increases or decreases in the scope of services. The documentation must consist of two full years of Medicaid cost reports, and must be provided to the Department within 150 days from the FQHC’s fiscal year end to be considered in the calculation of the adjusted rate. Upon the Department’s determination of a change in the scope of services, the effective date for the new rate will be 30 days after receipt of the Medicare cost reports.

The agency’s rates were set as of July 1, 2012, and are effective for services on or after that date. The agency-developed fee schedule is based upon review of the most recent year’s paid claims information, national coding lists, and documentation submitted by providers and associated medical professional organizations. All governmental and private providers will be reimbursed according to the same fee schedule published on the agency’s website http://dss.sd.gov/sdmedx/includes/providers/feeschedules/dss/index.aspx.

2. Orthodontic services. The agency’s rates were set as of July 1, 2012, and are effective for services on or after that date. The agency-developed fee schedule is based upon review of the most recent year’s paid claims information, national coding lists, and documentation submitted by providers and associated medical professional organizations. The fee schedule is published on the agency’s website http://dss.sd.gov/sdmedx/includes/providers/feeschedules/dss/index.aspx. Except as otherwise noted in the plan, the agency-developed fee schedule rates are the same for all governmental and private providers.

Payments for orthodontia are made in installments as follows: first payment of one third of the total allowance is made at the time of the installation of the hardware; the second payment is one third of the total allowance and made after 12 months of treatment and the provider has verified the patient is in active treatment; and the final one third of the total allowance is paid following notification from the provider that full treatment has been rendered.

3. Private duty nursing. Payment for extended nursing services is at an hourly rate based on a fee schedule developed by the State agency. The agency’s rates were set as of July 1, 2012, and are effective for services on or after that date. The agency-developed fee schedule is based upon a review of the most recent year’s paid claims information, national coding lists, and documentation submitted by providers and associated medical professional organizations. All governmental and private providers will be reimbursed according to the same fee schedule published on the agency’s website http://dss.sd.gov/sdmedx/includes/providers/feeschedules/dss/index.aspx.

Payments for the above services are based upon the appropriate published fee schedule unless a lower amount is billed by the provider.

Increased Primary Care Service Payment 42 CFR 447.405, 447.410, 447.415

Attachment 4.19-B: Physician Services 42 CFR 447.405 Amount of Minimum Payment

The state reimburses for services provided by physicians meeting the requirements of 42 CFR 447.400(a) at the Medicare Part B fee schedule rate using the Medicare physician fee schedule rate in effect in calendar years 2013 and 2014 or, if greater, the payment rates that would be applicable in those years using the calendar year 2009 Medicare physician fee schedule conversion factor. If there is no applicable rate established by Medicare, the state uses the rate specified in a fee schedule established and announced by CMS.

- The rates reflect all Medicare site of service and locality adjustments.
- The rates do not reflect site of service adjustments, but reimburse at the Medicare rate applicable to the office setting. South Dakota has only one Medicare GPCI and will annually adjust the fee schedule associated with this SPA to account for changes in Medicare rates.
- The rates reflect all Medicare geographic/locality adjustments.
- The rates are statewide and reflect the mean value over all counties for each of the specified evaluation and management and vaccine billing codes.

The following formula was used to determine the mean rate over all counties for each code:

Method of Payment

- The state has adjusted its fee schedule to make payment at the higher rate for each E&M and vaccine administration code.
- The state reimburses a supplemental amount equal to the difference between the Medicaid rate in effect on July 1, 2009 and the minimum payment required at 42 CFR 447.405.

Supplemental payment is made: ☐ monthly ☑ quarterly

Primary Care Services Affected by this Payment Methodology

- This payment applies to all Evaluation and Management (E&M) billing codes 99201 through 99499.

Physician Services – Vaccine Administration

For calendar years (CYs) 2013 and 2014, the state reimburses vaccine administration services furnished by physicians meeting the requirements of 42 CFR 447.400(a) at the lesser of the state regional maximum administration fee set by the Vaccines for Children (VFC) program or the Medicare rate in effect in CYs 2013 and 2014 or, if higher, the rate using the CY 2009 conversion factor.

☐ Medicare Physician Fee Schedule rate
☑ State regional maximum administration fee set by the Vaccines for Children program
☐ Rate using the CY 2009 conversion factor

Documentation of Vaccine Administration Rates in Effect 7/1/09

The state uses one of the following methodologies to impute the payment rate in effect at 7/1/09 for code 90460, which was introduced in 2011 as a successor billing code for billing codes 90465 and 90471.

☑ The imputed rate in effect at 7/1/09 for code 90460 equals the rate in effect at 7/1/09 for billing codes 90465 and 90471 times their respective claims volume for a 12 month period which encompasses July 1, 2009. Using this methodology, the imputed rate in effect for code 90460 at 7/1/09 is: $9.09.

☐ A single rate was in effect on 7/1/09 for all vaccine administration services, regardless of billing code. This 2009 rate is: ________________________________.

☐ Alternative methodology to calculate the vaccine administration rate in effect 7/1/09: ________________________________.

Note: This section contains a description of the state’s methodology and specifies the affected billing codes.

12a. Prescription Drugs

1. The State agency will reimburse prescribed drugs, including covered non-legend drugs that are prescribed by an authorized prescriber and legend drugs prescribed by an authorized prescriber, at the lowest of the following:

   i. The pharmacy’s usual and customary charge (U&C) to the general public for the drug; or

   ii. South Dakota Medicaid’s established State Maximum Allowable Cost (SMAC) for that drug plus the professional dispensing fee. (South Dakota Medicaid’s SMAC is acquisition cost based and includes all types of medications, including specialty and hemophilia products); or

   iii. The current National Average Drug Acquisition Cost (NADAC) for that drug plus the professional dispensing fee; or

   iv. If there is no NADAC for the drug, the current wholesale acquisition cost (WAC) of the drug plus the professional dispensing fee.

In compliance with 42 CFR 447.512 and 447.514, reimbursement for drugs subject to Federal Upper Limits (FULs) may not exceed FULs in the aggregate.

2. All Indian Health Service and tribal pharmacies are reimbursed at the encounter rate except for high cost drugs. High cost drugs are reimbursed according to the Federal Supply Schedule logic in item 3 on this page. A “high cost drug” is a drug with an acquisition cost that exceeds the encounter rate.

That is, in addition to the professional dispensing fee, they will be reimbursed the lowest of the U&C, SMAC, NADAC, or WAC if no NADAC price exists.

6. Drugs acquired at nominal price (outside of 340B or FSS) will be reimbursed at no more than the actual acquisition price plus the professional dispensing fee while using the logic described above and below.
7. South Dakota Medicaid requires physician administered drugs to be billed by the facility in which it was administered. Payment for physician administered drugs is limited to the lesser of the provider’s U&C or South Dakota Medicaid’s fee schedule. For physician administered drugs not listed in the fee schedule, payment is limited to 40 percent of the provider’s U&C.

8. Where indicated that South Dakota Medicaid will reimburse a professional dispensing fee, the professional dispensing fee is $10.55.

9. Drugs acquired through the federal 340B drug program and dispensed by covered entities as described in section 1927(a)(5)(B) of the Social Security Act are not covered.

10. Drugs acquired through the federal 340B drug pricing program and dispensed by 340B contract pharmacies are not covered.

11. Investigational drugs are not covered.

12. In the event that the above methodology is projected to result in expenditures that exceed the amount appropriated by the state legislature for the current state fiscal year the state may submit a state plan amendment to revise the reimbursement methodology.

Payment Adjustment for Other Provider-Preventable Conditions

The State Medicaid Agency meets the requirements of 42 CFR Parts 434, 438, and 447 Subpart A, and sections 1902(a)(4), 1902(a)(6), and 1903 of the Act with respect to non-payment for Other Provider-Preventable Conditions (OPPCs).

Other Provider-Preventable Conditions

The State identifies the following Other Provider-Preventable Conditions (OPPCs) for non-payment under this section of this State Plan:

- Wrong surgical or other invasive procedure performed on a patient; surgical or other invasive procedure performed on the wrong body part; surgical or other invasive procedure performed on the wrong patient.

The agency will adopt the baseline for OPPCs as described above. The following reimbursement changes will apply:

The agency will deny payment for these conditions in any health care setting or provider in this section of this State Plan. For claims submitted on or after July 1, 2012, the agency will follow the minimum CMS regulations in 42 CFR 447 and deny payment for all of the OPPCs identified in 42 CFR 447.

In compliance with 42 CFR 447.26(c), the State provides:

1. That no reduction in payment for an OPPC will be imposed on a provider when the condition defined as an OPPC for a particular patient existed prior to the initiation of treatment for that patient by that provider;

2. That reductions in provider payment will be limited to the extent that the following apply:
   i. The identified OPPCs would otherwise result in an increase in payment.
   ii. The agency can reasonably isolate for non-payment the portion of the payment directly related to treatment for, and related to, the OPPCs.

3. Assurance that non-payment for OPPCs does not prevent access to services for Medicaid beneficiaries.

If the individual cases are identified throughout the OPPCs implementation period, the agency will adjust reimbursements according to the methodology above. Denial of payment will be limited to the additional care required by the OPPC. The agency will review from time to time the list of OPPCs and add to the list if the agency makes a medical finding using evidence-based guidelines. In such an event, the agency will disseminate to providers, through manuals or bulletins, a current list of OPPCs pursuant to this section of this State Plan.

Additional OPPCs identified below:
