Promoting Health

The program is designed to improve health outcomes for participants by helping them find meaningful work. As noted in the Program Summary section studies have identified a correlation between work and wellbeing. In addition, the program will focus on improving health outcomes for participants by increasing recipient knowledge regarding healthy living and promoting the utilization of preventative services with the intent of helping participants develop healthy habits. The program will accomplish this objective through the following mechanisms:

1. Increasing identification and treatment of behavioral health conditions including substance use disorders.
2. Promoting Well-Adult visits, immunizations, and preventative dental visits.
3. Requiring one Well-Adult visit and one preventative dental visit during the period an individual is eligible for Transitional Medical Benefits (TMB) to qualify for premium assistance.
