RE: **South Dakota Medicaid billing requirements for Rendering NPI and Taxonomy**

Good afternoon,

South Dakota Medicaid has recently made an update to billing requirements to always require the rendering (servicing) NPI and taxonomy for claims billed on a CMS 1500 claim form. We have received questions and feedback about this requirement for electronic submissions when the rendering provider information is the same as the billing provider information. This requirement is consistent with the ANSI 5010 Guide that defines "Situational" data as an element or segment that is required when a payer's adjudication is known to be impacted by that information. We use this data in our matching process to identify providers correctly. The rendering provider information is required for paper and electronic submissions. Billing requirements are outlined in the Professional Services Billing Manuals and DSS Companion Guide (837P) found online here.

If you have questions about this requirement please contact the Telephone Service Unit at 800-452-7691 (in-state), or 605-945-5006 (out-of-state).

Thank you,
South Dakota Medicaid
