RE: New Data Sources for South Dakota Health Link

South Dakota Medicaid is excited to announce that it has provided two new data sources to South Dakota Health Link. South Dakota Health Link allows medical information to be shared between medical professionals through a secure platform to improve quality, safety and efficiency of care provided.

Medicaid is now contributing medication prescription claims and dental claims data to South Dakota Health Link. The medication prescription claims data will enhance other robust medication information already available in the Point of Care Exchange. Providers now have access to a suite of Medication data which includes, the Nationwide Filled Medication query, South Dakota's Prescription Drug Monitoring Program, and the South Dakota Medicaid Prescription Claims Data. The dental claims data will provide users information about any recent dental procedure as well as preventive oral care provided.

Users can find the medication prescription claims data source by accessing it through the following steps:

- [Login to HealthLink](#)
- Click Medications on left hand side.
- Under the Medication History section, click Medication Fill History tab.

To find the dental claims data, end users will access Face Sheets using the following steps:

- [Login to HealthLink](#)
- Click Profile & Face Sheets button on top right.
- Click Face Sheets tabs.
- Click the Face Sheet from South Dakota Medicaid Dental.

Current members of South Dakota Health Link can visit [here](#), for training or onboarding assistance. Please note that recipients can choose to opt out of the HealthLink by completing the Opt-Out form at <https://sdhealthlink.org/wp-content/uploads/2020/02/SDHL-NonParticipationForm.pdf>.

Sincerely,

South Dakota Medicaid
