OUTPATIENT HOSPITAL SERVICES

ELIGIBLE PROVIDERS

In order to receive payment, all eligible servicing and billing provider’s National Provider Identifiers (NPI) must be enrolled with South Dakota Medicaid. Servicing providers acting as a locum tenens provider must enroll in South Dakota Medicaid and be listed on the claim form. Please refer to the provider enrollment chart for additional details on enrollment eligibility and supporting documentation requirements.

South Dakota Medicaid has a streamlined enrollment process for eligible ordering, referring, and attending providers that may require no action on the part of the provider as submission of claims constitutes agreement to the South Dakota Medicaid Provider Agreement.

ELIGIBLE RECIPIENTS

Providers are responsible for checking a recipient’s Medicaid ID card and verifying eligibility before providing services. Eligibility can be verified using South Dakota Medicaid’s online portal.

The following recipients are eligible for medically necessary services covered in accordance with the limitations described in this chapter:

</table>

Refer to the Recipient Eligibility manual for additional information regarding eligibility including information regarding limited coverage aid categories.
Covered Services and Limits

General Coverage Principles
Providers should refer to the General Coverage Principles manual for basic coverage requirements all services must meet. These coverage requirements include:

- The provider must be properly enrolled;
- Services must be medically necessary;
- The recipient must be eligible; and
- If applicable, the service must be prior authorized.

The manual also includes non-discrimination requirements providers must abide by.

Outpatient Hospital Covered Services
The following outpatient hospital services are covered by South Dakota Medicaid:

- Laboratory services;
- X-ray and other radiology services;
- Emergency room services. Refer to the Emergency Services manual for additional information;
- Medical supplies used during treatment at the facility;
- Physical therapy, speech therapy, and occupational therapy when furnished by or supervised by a licensed therapist and periodically reviewed by a physician or other licensed practitioner. Refer to the Therapy Services manual for additional information. When physical therapy, speech therapy, and occupational therapy are listed in a child’s individual education plan (IEP), Care Plan, or 504 Plan the services must be billed by the school district. Refer to the School Districts manual for additional information;
- Whole blood or packed red cells;
- Drugs and biologicals which cannot be self-administered. Refer to the Physician Administered Drugs, Vaccines, and Immunizations manual for additional information;
- Dialysis treatments. Refer to the Renal Dialysis Services manual for additional information;
- Services of hospital-based physicians or other licensed practitioners;
- Telemedicine consultation services. Refer to the Telemedicine manual for additional information;
- Outpatient surgical procedures. Refer to the Surgical Services manual for additional information;
- Sterilizations authorized under ARSD 67:16:02:09 and in accordance with the Family Planning And Sterilization Services manual;
- Hyperbaric oxygen therapy if the requirements listed in the Prior Authorization manual and the criteria below are met; and
- Cardiac rehabilitation – Phase II.

Hydrobaric Oxygen Therapy
Hydrobaric oxygen therapy is covered if prior authorized by South Dakota Medicaid. Hydrobaric oxygen therapy is limited to outpatient treatment for treatment of the following:

- Acute carbon monoxide intoxication;
- Decompression illness;
• Gas embolism;
• Gas gangrene;
• Acute traumatic peripheral ischemia. Adjunctive treatment must be used in combination with accepted standard therapeutic measures when loss of function, limb, or life is threatened;
• Crush injuries and suturing of severed limbs. Adjunctive treatment must be used when loss of function, limb, or life is threatened;
• Acute peripheral arterial insufficiency;
• Preparation and preservation of compromised skin grafts;
• Chronic refractory osteomyelitis which is unresponsive to conventional medical and surgical management;
• Osteoradionecrosis as an adjunct to conventional treatment;
• Soft tissue radionecrosis as an adjunct to conventional treatment;
• Cyanide poisoning;
• Progressive necrotizing infections (necrotizing fasciitis)
• Actinomycosis, only as an adjunct to conventional therapy when the disease process is refractory to antibiotics and surgical treatment; or
• Idiopathic sudden sensorineural hearing loss (SSHL) -- SSHL greater than 30 dB affecting greater than 3 consecutive frequencies of pure-tone thresholds when member has failed oral and intra-tympanic steroids, and HBOT is initiated within 3 months after onset.

Hyperbaric oxygen therapy for an individual who has diabetes is a covered service if used in conjunction with standard wound care and the following conditions are met:

- The individual has Type I or Type II diabetes and has a lower extremity wound that is due to diabetes;
- The individual has a Wagner Grade II or higher wound; and
- The individual has failed a course of standard wound therapy
  - an individual has failed a course of standard wound care if there are no measurable signs of healing for at least 30 days of treatment using standard wound care. Standard wound care for an individual with diabetes includes the following:
    - Completion of an assessment of the individual's vascular status and, if possible, correction of any vascular problems in the affected limb;
    - Optimization of nutritional status;
    - Optimization of glucose control;
    - Debridement to remove devitalized tissue;
    - Maintenance of a clean, moist bed of granulation tissue with appropriate moist dressings;
    - Appropriate off-loading; and
    - Treatment necessary to resolve any infection that might be present.
- Wounds must be evaluated at least every 30 days during administration of hyperbaric oxygen therapy. Continued treatment with hyperbaric oxygen therapy is not covered if measurable signs of healing have not been demonstrated within any 30-day period of treatment.

Magnetoencephalography (MEG) and Magnetic Source Imaging (MSI)
Magnetoencephalography (MEG) and Magnetic Source Imaging (MSI) are covered if prior authorized by South Dakota Medicaid. Services must be medically necessary and meet one of the following indications:

- Pre-surgical evaluation in patients with intractable focal epilepsy to identify and localize area(s) of epileptiform activity when other techniques designed to localize a focus are discordant or inconclusive; or
- Pre-surgical evaluation in patients with tumors and AVM's located in close proximity to the eloquent cortex.

**Inpatient and Outpatient Status**

Inpatient status occurs when a recipient has been admitted to a hospital on the recommendation of a physician or a dentist and the stay in the hospital is 24 hours or more. The following are considered an inpatient stay even if the length of stay is less than 24 hours:

- Delivery of an infant or newborn care;
- Death of an inpatient who meets inpatient criteria at the time of admission; and
- Inpatient that needs to be transferred to a higher level of care.

Outpatient services are professional services provided to a recipient at a participating hospital, but the services provided to the recipient along with any room and board are for a period of less than 24 hours. A “transfer to detox” service is considered an outpatient service. Observation services are outpatient hospital services.

**Observation Status**

Observation care is a well-defined set of specific, clinically appropriate services, which include ongoing short-term treatment, assessment, and reassessment, that are furnished while a decision is being made regarding whether patients will require further treatment as hospital inpatients or if they are able to be discharged from the hospital. Observation services are commonly ordered for patients who present to the emergency department and who then require a significant period of treatment or monitoring in order to make a decision concerning their admission or discharge. Observation services are covered only when provided by the order of a physician or another individual authorized by State licensure law and hospital staff bylaws to admit patients to the hospital or to order outpatient services.

Observation services must also be reasonable and necessary to be covered by South Dakota Medicaid. In only rare and exceptional cases do reasonable and necessary outpatient observation services span more than 48 hours. In the majority of cases, the decision whether to discharge a patient from the hospital following resolution of the reason for the observation care or to admit the patient as an inpatient can be made in less than 48 hours, usually in less than 24 hours.

**Reporting Hours of Observation**

Observation time begins at the clock time documented in the patient's medical record, which coincides with the time that observation care is initiated in accordance with a physician’s order. Hospitals should round to the nearest hour. For example, a patient who began receiving observation services at 3:03 p.m. according to the nurses’ notes and was discharged to home at 9:45 p.m. when observation care
and other outpatient services were completed, should have a “7” placed in the units field of the reported observation HCPCS code.

General standing orders for observation services following all outpatient surgery are not recognized. Hospitals should not report as observation care, services that are part of another covered service, such as postoperative monitoring during a standard recovery period (e.g., 4-6 hours), which should be billed as recovery room services. Similarly, in the case of patients who undergo diagnostic testing in a hospital outpatient department, routine preparation services furnished prior to the testing and recovery afterwards are included in the payments for those diagnostic services.

Observation services should not be billed concurrently with diagnostic or therapeutic services for which active monitoring is a part of the procedure (e.g., colonoscopy, chemotherapy). In situations where such a procedure interrupts observation services, hospitals may determine the most appropriate way to account for this time. For example, a hospital may record for each period of observation services the beginning and ending times during the hospital outpatient encounter and add the length of time for the periods of observation services together to reach the total number of units reported on the claim for the hourly observation services. A hospital may also deduct the average length of time of the interrupting procedure, from the total duration of time that the patient receives observation services.

Observation time ends when all medically necessary services related to observation care are completed. For example, this could be before discharge when the need for observation has ended, but other medically necessary services not meeting the definition of observation care are provided (in which case, the additional medically necessary services would be billed separately or be included as part of the emergency department or clinic visit). Alternatively, the end time of observation services may coincide with the time the patient is actually discharged from the hospital or admitted as an inpatient.

Observation time may include medically necessary services and follow-up care provided after the time that the physician writes the discharge order, but before the patient is discharged. However, reported observation time would not include the time patients remain in the hospital after treatment is finished for reasons such as waiting for transportation home.

If a period of observation spans more than 1 calendar day, all of the hours for the entire period of observation must be included on a single line and the date of service for that line is the date that observation care begins.

**Outpatient Services Incurred Prior to an Inpatient Stay**
Outpatient services incurred within three days immediately preceding the inpatient stay are included in the inpatient reimbursement unless the outpatient service is not related to the inpatient stay. This provision applies only if the facilities providing the inpatient and outpatient services are owned by the same entity.

**Hospital Based Psychiatric Partial Hospitalization Programs (PHP)**
PHPs may be covered under Medicaid when they are provided by a hospital outpatient department. Partial hospitalization is active treatment that incorporates an individualized treatment plan which
describes a coordination of services wrapped around the particular needs of the patient and includes a multidisciplinary team approach to patient care under the direction of a physician. The program reflects a high degree of structure and scheduling.

Recipient Eligibility Criteria
South Dakota Medicaid will cover partial hospitalization for recipients age 20 and younger when the recipient meets the following criteria:

- Patients admitted to a PHP must be under the care of a physician who certifies the need for partial hospitalization.
- The patient requires comprehensive, structured, multimodal treatment requiring medical supervision and coordination, provided under an individualized plan of care, for a minimum of 20 hours per week because of an active psychiatric diagnosis which severely interferes with multiple areas of daily life, including social, vocational, and/or educational functioning. Such dysfunction generally is of an acute nature.
- The recipient was discharged from an inpatient hospital treatment program and the PHP is in lieu of continued inpatient treatment or in the absence of partial hospitalization, the recipient would be at reasonable risk of requiring inpatient hospitalization.
  - Where partial hospitalization is used to shorten an inpatient stay and transition the patient to a less intense level of care, there must be evidence of the need for the acute, intense, structured combination of services provided by a PHP.
- The recipient is cognitively and emotionally able to participate in treatment.

Ineligibility Criteria
Partial hospitalization services are not covered for recipients that meet one or more of the following criteria:

1. The recipient is an active or potential danger to self or others, or sufficient impairment exists that a more intense level of service is required.
2. The recipient has medical conditions or impairments that would prevent beneficial utilization of services.
3. The recipient exhibits a serious and persistent mental illness consistent throughout time and is not in an acute exacerbation of the mental illness;
4. The recipient is otherwise psychiatrically stable or requires medication management only.
5. The recipient requires a level of structure and supervision beyond the scope of the program (e.g., considered a high risk for non-compliant behavior and/or elopement).
6. The recipient can be safely maintained and effectively treated at a less intensive level of care.
7. The primary problem is social, economic (i.e., housing, family conflict, etc.), or one of physical health without a concurrent major psychiatric episode meeting criterion for this level of care, or admission is being used as an alternative to incarceration.
8. The focus of treatment is not primarily for peer socialization and group support.

PHP Coverage Criteria
Partial hospitalization services that make up a program of active treatment must be vigorous and proactive (as evidenced in the individual treatment plan and progress notes) as opposed to passive and custodial. The recipient must have the need for the active treatment provided by the program. It is the
need for intensive, active treatment of the recipient's condition to maintain a functional level and to prevent relapse or hospitalization, which qualifies the patient to receive partial hospitalization services.

This program of services provides for the diagnosis and active, intensive treatment of the individual's serious psychiatric condition and, in combination, are reasonably expected to improve or maintain the individual's condition and functional level and prevent relapse or hospitalization. The overall intent of the partial program admission is to treat the serious presenting psychiatric symptoms. Continued treatment in order to maintain a stable psychiatric condition or functional level requires evidence that less intensive treatment options (e.g., intensive outpatient, psychosocial, day treatment, and/or other community supports) cannot provide the level of support necessary to maintain the patient and to prevent hospitalization. Patients admitted to a PHP do not require 24 hour per day supervision as provided in an inpatient setting and must have an adequate support system to sustain/maintain themselves outside the PHP.

Patients admitted to a PHP generally have an acute onset or decompensation of a covered Axis I mental disorder, as defined by the current edition of the Diagnostic and Statistical Manual published by the American Psychiatric Association or listed in Chapter 5 of the most current edition of the International Classification of Diseases (ICD), which severely interferes with multiple areas of daily life. The degree of impairment will be severe enough to require a multidisciplinary intensive, structured program, but not so limiting that patients cannot benefit from participating in an active treatment program. It is the need, as certified by the treating physician, for the intensive, structured combination of services provided by the program that constitute active treatment, that are necessary to appropriately treat the patient's presenting psychiatric condition.

**PHP Covered Services**

Items and services that can be included as part of the structured, multimodal active treatment program include:

- Individual, group, or family psychotherapy with physicians, psychologists, or other mental health professionals authorized or licensed by the State. The primary purpose of family psychotherapy services must be for the treatment of the recipient's condition;
- Occupational therapy requiring the skills of a qualified occupational therapist. Occupational therapy, if required, must be a component of the physician's treatment plan for the individual;
- Services of other staff (social workers, psychiatric nurses, and others) trained to work with psychiatric patients;
- Drugs and biologicals that cannot be self-administered and are furnished for therapeutic purposes;
- Individualized activity therapies that are not primarily recreational or diversionary. These activities must be individualized and essential for the treatment of the patient's diagnosed condition and for progress toward treatment goals;
- Patient training, to the extent the training activities are closely and clearly related to the individual's care and treatment of his/her diagnosed psychiatric condition;
- Medically necessary diagnostic services related to mental health treatment.
Initial Psychiatric Evaluation/Certification
Upon admission, the physician must certify that the recipient admitted to the PHP would require inpatient psychiatric hospitalization if the partial hospitalization services were not provided. The certification should identify the diagnosis and psychiatric need for the partial hospitalization. Partial hospitalization services must be furnished under an individualized written plan of care, established by the physician, which includes the active treatment provided through the combination of structured, intensive services identified in the PHP covered services section of this manual that are reasonable and necessary to treat the presentation of serious psychiatric symptoms and to prevent relapse or hospitalization.

Physician Recertification Requirements.
• Signature – The physician recertification must be signed by a physician who is treating the recipient and has knowledge of the patient’s response to treatment.
• Timing – The first recertification is required as of the 18th calendar day following admission to the PHP. Subsequent recertifications are required at intervals established by the provider, but no less frequently than every 30 days.
• Content – The recertification must specify that the patient would otherwise require inpatient psychiatric care in the absence of continued stay in the PHP and describe the following:
  o The patient’s response to the therapeutic interventions provided by the PHP;
  o The patient’s psychiatric symptoms that continue to place the patient at risk of hospitalization; and
  o Treatment goals for coordination of services to facilitate discharge from the PHP.

Treatment Plan
Partial hospitalization is active treatment pursuant to an individualized treatment plan, prescribed and signed by a physician, which identifies treatment goals, describes coordination of services, is structured to meet the particular needs of the patient, and includes a multidisciplinary team approach to patient care. According to current practice guidelines, the treatment goals should be measurable, functional, time-framed, medically necessary, and directly related to the reason for admission. The treatment goals described in the treatment plan should directly address the presenting symptoms and are the basis for evaluating the patient’s response to treatment. Treatment goals should be designed to measure the patient’s response to active treatment.

The plan should document ongoing efforts to restore the individual patient to a higher level of functioning that would permit discharge from the program or reflect the continued need for the intensity of the active therapy to maintain the individual’s condition and functional level and to prevent relapse or hospitalization. Activities that are primarily recreational and diversionary or provide only a level of functional support that does not treat the serious presenting psychiatric symptoms placing the patient at risk, do not qualify as partial hospitalization services. The treatment plan clearly states what benefits the patient can expect to receive by participating in the program and promotes the patient’s ability to independently manage symptoms and resolve problems. The goals of treatment cannot be based solely on the need for structure and support.
Progress Notes
PHPs are required to maintain daily progress notes that include a description of the nature of the treatment service, the recipient’s response to the therapeutic intervention, and its relation to the goals indicated in the treatment plan. Progress or treatment notes should be entered chronologically each day treatment is provided. Progress notes must include the following details:

- Information identifying the recipient receiving services, including name and unique identification number;
- The date, location, time met, services provided, and the duration of the session;
- The service activity code or title describing the service code or both;
- A brief assessment of the recipient’s current symptoms and functioning;
- A description of what occurred during the session, including the specific action taken or plan developed to address unresolved issues to achieve identified treatment goals or objectives;
- A brief description of what the recipient and provider plan to work on during the next session, including work that may occur between sessions, if applicable; and
- The signature and credentials of the staff providing the service.

Discharge Planning
Recipients in PHP may be discharged by either stepping up to an inpatient level of care which would be required for patients needing 24-hour supervision or stepping down to a less intensive level of outpatient care when their clinical condition improves or stabilizes, and no longer requires structured, intensive, multimodal treatment.

Discharge planning from PHP may reflect the types of best practices recognized by professional and advocacy organizations that ensure coordination of needed services and follow-up care. These activities include linkages with community resources, supports, and providers in order to promote a recipient’s return to a higher level of functioning in the least restrictive environment.

Coverage limitations
Partial hospitalization services are limited to 30 days per plan year (July 1 – June 30). PHPs may request a prior authorization for additional coverage days if they believe additional services are medically necessary.

Prior Authorization for Hospital Services
Services requiring prior authorization are listed on the Department’s website. If a prior authorization is required it is the responsibility of the attending physician, other licensed practitioner, the physician or other licensed practitioner representative, or the hospital to obtain prior authorization from the Department or the Department’s authorized representative prior to services being provided. If a service is provided without an authorization the claim may be denied.

Emergency Services
Please refer to the Emergency Services manual for information regarding services provided in an emergency department.
NON-COVERED SERVICES

General Non-Covered Services
Providers should refer to ARSD 67:16:01:08 or the General Coverage Principles manual for a general list of services that are not covered by South Dakota Medicaid.

Outpatient Hospital Non-Covered Services
In addition to other services not specifically listed as a covered outpatient, the following services are not covered by South Dakota Medicaid for outpatient hospitals:

- Ambulance services;
- Physician’s services;
- Private duty nursing services;
- Personal comfort or convenience items;
- Custodial care;
- Autopsies;
- Psychiatric services for adults age 21 or older;
- Chemical dependency or chemical abuse treatment services. For information regarding coverage of services provided by a substance use disorder treatment agency please refer to the Substance Use Disorder Agency Services manual;
- Health Care Acquired Conditions as defined in Section 2702 of the Patient Protection and Affordable Care Act; and
- Other Provider Preventable Conditions in any Medicaid care settings where these events occur as defined in Section 2702 of the Patient Protection and Affordable Care Act.

Hospital Based Psychiatric Partial Hospitalization Program
The following are non-covered services for a PHP:

- Day care programs, which provide primarily social, recreational, or diversionary activities, custodial or respite care;
- Programs attempting to maintain psychiatric wellness, where there is no risk of relapse or hospitalization, e.g., day care programs for the chronically mentally ill;
- Services to hospital inpatients;
- Meals, self-administered medications, transportation;
- Vocational/career training;
- Academic educational services;
- Services solely recreational in nature;
- Services for the benefit of individuals other than eligible recipient;
- Services provided in an institution for mental disease;
- Services provided to clients who are in detoxification centers; and
- Services provided to clients who are incarcerated in a correctional facility.
DOCUMENTATION REQUIREMENTS

General Requirements
Providers must keep legible medical and financial records that fully justify and disclose the extent of services provided and billed to South Dakota Medicaid. These records must be retained for at least 6 years after the last date a claim was paid or denied. Please refer to the Documentation and Record Keeping manual for additional requirements.

REIMBURSEMENT AND CLAIM INSTRUCTIONS

Timely Filing
South Dakota Medicaid must receive a provider’s completed claim form within 6 months following the month the service was provided. Requests for reconsiderations will only be considered if they are received within the timely filing period or within 3 months of the date a claim was denied. The time limit may be waived or extended by South Dakota Medicaid in certain circumstances. Providers should refer to the General Claim Guidance manual for additional information.

Third-Party Liability
Medicaid recipients may have one or more additional source of coverage for health services. South Dakota Medicaid is generally the payer of last resort. Providers must pursue the availability of third-party payment sources and should use the Medicare Crossover or Third-Party Liability billing instructions when applicable. Providers should refer to the General Claim Guidance manual for additional information.

Upper Payment Limits
Under 42 CFR 447.321, upper payment limit tests are required to ensure that Medicaid payments made under the state plan do not exceed what would be paid for the services furnished by the group of facilities under Medicare payment principles. South Dakota Medicaid performs this analysis on a yearly basis. Payments in excess of the upper payment limit are subject to recoupment.

Medicare Prospective Payment System Hospitals Reimbursement
Medicare prospective payment system hospitals are reimbursed using the South Dakota Medicaid’s outpatient prospective payment system (OPPS). Under OPPS, services are reimbursed using ambulatory payment classifications (APC) that have an associated relative weight. South Dakota Medicaid establishes a conversion factor for each hospital. Refer to the Fee Schedule website for a list of exceptions where South Dakota Medicaid does not follow Medicare, Non-OPPS Fee schedule, and the weight file.

Outpatient prospective payments may not include items and services for which payment may be made under other South Dakota Medicaid coverage such as physician services, certified registered nurse anesthetist services, prosthetic devices, ambulance services, orthotic devices and durable medical equipment for use in the patient’s home, unless the items and services are specifically included as covered in the APC fee schedule.
Medicare Critical Access Hospitals Reimbursement
For in-state outpatient hospital services provided by a Medicare Critical Access Hospital with more than 30 Medicaid discharges during the hospital’s fiscal year ending after June 30, 1996 and before July 1, 1997 the hospital is reimbursed at a hospital specific percentage of their usual and customary charges. Refer to the information below for the reimbursement methodology for laboratory and surgical procedures. Pharmacy revenue codes with billed charges totaling $100,000 or more are reimbursed at invoice cost and must be submitted with an itemized invoice.

For in-state outpatient hospital services provided by a Medicare Critical Access Hospital with less than 30 Medicaid discharges during the hospital’s fiscal year ending after June 30, 1996 and before July 1, 1997 the hospital is reimbursed at 90 percent of the hospital’s usual and customary charge. Refer to the information below for the reimbursement methodology for surgical and laboratory procedures. Pharmacy revenue codes with billed charges totaling $100,000 or more are reimbursed at invoice cost and must be submitted with an itemized invoice.

Medicaid Access Critical Hospitals Reimbursement
Medicaid access critical hospitals are reimbursed at 90 percent of their usual and customary charge for the service provided.

Indian Health Service and Tribal 638 Outpatient Hospital Reimbursement
Indian Health Service and tribal 638 provider are reimbursed at the outpatient encounter rate published annually in the Federal Register by the Department of Health and Human Services. For additional information including information regarding multiple encounters and encounter restrictions please refer to the Indian Health Service and Tribal 638 Facilities Manual.

Out-of-State Hospitals Reimbursement
Reimbursement for outpatient services at out-of-state hospitals is 38.20 percent of the hospital’s usual and customary charge. Refer to the information below for the reimbursement methodology for laboratory. Pharmacy revenue codes with billed charges totaling $100,000 or more are reimbursed at invoice cost and must be submitted with an itemized invoice. Additional information regarding out-of-state services requirements is available in the Out-of-State Providers manual.

Outpatient Laboratory Services Reimbursement
All outpatient laboratory services, with the exception of packaged APC laboratory services, are reimbursed at the lesser of the provider’s usual and customary charge or the fee established on the Laboratory fee schedule. For procedures listed on Medicare’s Clinical Diagnostic Laboratory Fee Schedule, Medicaid’s maximum allowable reimbursement rate will not exceed Medicare’s established fee in accordance with 1903(i)(7) of the SSA. Other laboratory services will be paid at a fee established by South Dakota Medicaid or 60% of the provider’s usual and customary charge.

Costs for outpatient laboratory services incurred within three days immediately preceding an inpatient stay at the same entity are included in the inpatient charges unless the outpatient laboratory service is not related to the inpatient stay.
Outpatient Surgical Services Reimbursement

All outpatient hospital surgical services except for OPPS hospitals are reimbursed according to the following methodology:

- Procedures not classified as a Group 1, 2, 3 or 4 on the Ambulatory Surgical Centers (ASC) fee schedule are reimbursed according to the provider’s standard reimbursement methodology.
- Procedures meeting the definition of an emergency service and listed as such on the claim form are reimbursed according to the provider’s standard reimbursement methodology.
- For procedures classified as a Group 1, 2, 3, or 4, the payment amount listed on the ASC fee schedule is multiplied by the following:
  - Class I Hospitals (a hospital which has 60 beds or less) - 1.25
  - Class II Hospitals (a hospital which has more than 60 beds) - 1.10
  - Class III Hospitals (regardless of the number of beds, a hospital which is a specialized surgical hospital, located in a city which has an ambulatory surgical center or a specialized surgical hospital, or is an out-of-state facility) - 1.00

Multiple Procedures

If more than one procedure is performed in a single operating session or on the same day and all of the procedures are classified as a group 1, 2, 3, or 4 on the ASC fee schedule, the procedure with the highest reimbursement rate is payable at 100 percent of the established rate. Each additional procedure is reimbursed at 50 percent of the established ASC rate.

The hospital is reimbursed according to their standard reimbursement methodology if multiple procedures are performed in a single operating session or on the same day and one of the procedures is not listed on the ASC fee schedule in group 1, 2, 3, or 4. This does not apply if the procedure(s) not listed on the ASC fee schedule is 36000, 36415, or 36600. If 36000, 36415, or 36600 is listed, the claim will still be reimbursed using the outpatient surgical reimbursement methodology and no additional payment is made for CPT code 36000, 36415, or 36600.

Services Included in the Reimbursement Rate

For outpatient surgical procedures classified as a group 1, 2, 3, or 4 on the ASC fee schedule, the rate of reimbursement for outpatient hospitals includes the following services:

- Nursing, technician, and related services;
- Use of the outpatient hospital facilities;
- Supplies, drugs, biologicals, surgical dressings, splinting and casting supplies, appliances, and equipment directly related to the provision of the services;
- Diagnostic or therapeutic services or items directly related to the provision of the service;
- Administrative and record-keeping services;
- Housekeeping items and supplies;
- Materials for anesthesia; and
- Recovery and observation room charges unless the patient is required to stay in excess of 12 hours after the completion of the outpatient service.

Claim Instructions

Claims for outpatient hospital services must be submitted on a UB-04 claim form or via an 837I
electronic transaction. Services must be billed at the hospital’s usual and customary charge to the general public. Detailed claim instructions are available on our website.

Modifiers
Modifier codes must be used if applicable. Please refer to our Authorized Modifier document for additional information.

Medicare Prospective Payment System Hospitals
Providers that are reimbursed using the APC methodology have the following additional requirements:
- Condition codes are required when billing for multiple occurrences during the same day.
- Value codes and value amount must be listed if the provider receives a discount on the medical supplies used.

It is essential to document all services provided by the facility. The facility and its physicians or other licensed practitioners are two distinct entities and there may be differences in coding, even on the same encounter. APC is intended to be the reimbursement for the utilization of hospital resources not the cognitive and procedural services of the physician or other licensed practitioner. Critical Care time must account for patient face-to-face time and does not account for physician or other licensed practitioner non-face-to-face time working on the patient’s behalf.

Observation Services
Hospitals are required to report observation charges under the following revenue codes:
- Revenue Code 0760 – General Classification Category
- Revenue Code 0762 – Observation Room

Hospitals should also report observation services using the applicable G series HCPCS code.

Vaccine Administration
Hospitals are required to report vaccine administration charges under the revenue code 0771.

Laboratory Services
The date of service is the date the specimen was drawn from the recipient. For an outpatient laboratory test, the laboratory that actually performed the test must submit the claim for the test. However, a laboratory participating in South Dakota Medicaid that did not perform the test may submit the claim for the test if the following conditions are met:
- The participating lab cannot complete the test as ordered by the referring physician; and
- The outside lab receiving the applicable test does not accept South Dakota Medicaid.

Laboratory services must be itemized and entered in Locators 42, 43, 44, 46, and 47 as follows:

Professional Services
Services of hospital-based physician, other licensed practitioners, and/or hospitalists are to be billed on a CMS 1500 claim form. Please see the CMS 1500 Claim Instructions for further instruction.

APC Partial Hospitalization Reimbursement
Partial hospitalization services are reimbursed under the APC payment methodology and APC system edits are applied to calculate the payment. This section provides a high-level overview of the APC processing of the partial hospitalization claims, but is not intended to be a complete explanation of the system logic or guarantee of per diem payment.

The partial hospitalization composite APC for hospital-based services is APC 5863. APC 5863 is a per diem payment. In order for the partial hospitalization services to be reimbursed under APC per diem, at least three partial hospitalization services have to be provided on the date of service and at least one of the services has to be a “primary” service as listed in the table below. The remaining services can either be “primary” or “secondary” services as listed below. If less than three PHP services are reported for the day or a “primary” service is not reported for a day, the PHP day is denied and the PHP APC is not assigned.

</table>
PHP claims must be submitted on a UB-04 claim form or via an 837I electronic transaction. An ICD-10-CM principal diagnosis code of mental health must be listed on the claim. The claim must be a 13x claim type and have a condition code 41.

Claims Documentation
An itemized invoice must be submitted with claims with billed charges of $100,000 or more for Revenue Codes 250-259, 630-636, and 890-899.

All claims with billed charges of $500,000 or more must be submitted with the following documentation:
- A detailed invoice of charges or patient ledger;
- The charge master listing in effect for dates of service;
- The discharge summary; and
- Nursing notes for the dates of service.

Claims submitted with incomplete documentation or without the above-mentioned documentation may be denied for records. These requirements apply to all in-state and out-of-state outpatient hospital claims.

DEFINITIONS

1. “Hospital services,” items and services provided on the hospital's premises to a patient by a hospital under the direction of a physician or a dentist.

2. "Inpatient," a patient who has been admitted to a hospital on the recommendation of a physician or a dentist.

3. “Outpatient,” a patient who receives professional services at a participating hospital, but is not provided with room, board, and services on a 24-hour basis.

4. "Other licensed practitioner," a physician assistant, nurse practitioner, clinical nurse specialist, nurse midwife, or nurse anesthetist who is licensed by the state to provide services and is performing within their scope of practice under the provisions of SDCL title 36.

5. “Participating hospital,” a hospital owned by the state in which it is located or licensed by the state licensing agency of the state in which it is located, certified by Medicare under Title XVIII of the Social Security Act, as amended on January 1, 2010, which agrees to participate under the medical assistance program.

6. "Prior authorization," written approval issuing authorization by the department to a provider before certain covered services may be provided.
7. "Usual, customary charge" or "usual and customary," the individual provider's normal charge to the general public for a specific service on the day the service was provided within the range of charges made by similar providers for such services and consistent with the prevailing market rates in the geographic area for comparable services.
