CRITERIA		
	Medical records to support use of product are submitted	
Initial Therapy **(check one)**	**Yes**	**No**
	Prescribed by or in consultation with provider in neurology with expertise in neuromuscular disorders	
	Individual must have a diagnosis of DMD with documentation of confirmed mutation that DMD gene is amenable to exon 51 skipping (submission of medical records, genetic testing, etc.)	
	If ambulatory, documentation of baseline 6-minute walk or NorthStar Ambulatory Assessment no longer than one month prior to beginning Exondys 51	
	If non-ambulatory, baseline functional level assessment with **all** the following is required, no longer than one month prior to beginning Exondys 51 • Brooke upper extremity scale (≤ 5) • Forced vital capacity assessment (of ≥30%) • Stable cardiac function with left ventricular ejection fraction (LVEF) > 40%	
	Individual is not ventilator dependent	
	Therapy is not being used in conjunction with other exon skipping therapies for DMD (ie Vyondys 53, Amondys 45, Viltepso)	
	Therapy is initiated before the age of 14	
	Individual has been on a stable dose of corticosteroids for 6 months unless contraindicated or adverse effects were previously experienced	
Continuation of Therapy **(check one)**	**Yes**	**No**
	Must continue to meet all initial criteria	
	Continued follow-up with neurology provider and/or neuromuscular clinic	
	Documentation of response to therapy is recorded every 6 months and shows stability or improvement in **both** of the following: • 6-minute walk or NorthStar Ambulatory Assessment • Respiratory function
