

Care Connect Program

The Care Connect Program was previously known as the Health Home program. Care Connect provides recipients with chronic conditions additional care coordination services.

Care Connect providers focus your health care on you as a whole person, teach you how to make healthy choices, connect you to services in your community, and work with your other providers to make sure you get the care you need.

Recipients in the Care Connect program need to choose their preferred Care Connect provider to manage their care. You can choose or change your provider on the DSS website, or call 605.773.3495.

Many specialty services require a referral from your Care Connect provider. The Recipient Handbook on the DSS website has a list of services that require a referral.
