

Exhibit A

Bureau of Information and Telecommunications Required IT Contract Terms

Any contract resulting from this RFP will include the State's required IT terms and conditions as listed below, along with any additional terms and conditions as negotiated by the parties. Due to the changing landscape of IT security and data privacy, the State reserves the right to add additional IT terms and conditions or modify the IT terms and conditions listed below to the resulting contract:

Pursuant to South Dakota Codified Law § 1-33-44, the Bureau of Information and Telecommunications ("BIT") oversees the acquisition of office systems technology, software, and services; telecommunication equipment, software, and services; and data processing equipment, software, and services for departments, agencies, commissions, institutions, and other units of state government. As part of its duties as the Executive Branch's centralized IT agency, BIT requires the contract terms and conditions of this Exhibit XX. For purposes of this Exhibit, [Vendor Name] will be referred to as the "Vendor."

It is understood and agreed to by all parties that BIT has reviewed and approved only this Exhibit. Due to the ever-changing security and regulatory landscape in IT and data privacy, before renewal of this Agreement BIT must review and approve the clauses found in this Exhibit as being the then current version of the clauses and if any additional required clauses are needed. Changes to clauses in this Exhibit must be approved in writing by all parties before they go into effect and a renewal of this Agreement is possible.

The Parties agree, when used in this Exhibit, the term "Vendor" will mean the Vendor and the Vendor's employees, subcontractors, agents, assigns, and affiliated entities.

Section I. Confidentiality of Information

For purposes of this paragraph, "State Proprietary Information" will include all information disclosed to the Vendor by the State. The Vendor will not disclose any State Proprietary Information to any third person for any reason without the express written permission of a State officer or employee with authority to authorize the disclosure. The Vendor must not: (i) disclose any State Proprietary Information to any third person unless otherwise specifically allowed under this Agreement; (ii) make any use of State Proprietary Information except to exercise rights and perform obligations under this Agreement; (iii) make State Proprietary Information available to any of its employees, officers, agents, or third party consultants except those who have a need to access such information and who have agreed to obligations of confidentiality at least as strict as those set out in this Agreement. The Vendor is held to the same standard of care in guarding State Proprietary Information as it applies to its own confidential or proprietary information and materials of a similar nature, and no less than holding State Proprietary Information in the strictest confidence. The Vendor must protect the confidentiality of the State's information from the time of receipt to the time that such information is either returned to the State or destroyed to the extent that it cannot be recalled or reproduced. The Vendor agrees to return all information received from the State to the State's custody upon the end of the term of this Agreement, unless otherwise agreed in a writing signed by both parties. State Proprietary Information will not include information that:

- A. was in the public domain at the time it was disclosed to the Vendor,
- B. was known to the Vendor without restriction at the time of disclosure from the State,
- C. that was disclosed with the prior written approval of State's officers or employees having authority to disclose such information,
- D. was independently developed by the Vendor without the benefit or influence of the State's information, and
- E. becomes known to the Vendor without restriction from a source not connected to the State of South Dakota.

State's Proprietary Information can include names, social security numbers, employer numbers, addresses and other data about applicants, employers or other clients to whom the State provides services of any kind. The Vendor understands that this information is confidential and protected under State law. The Parties mutually agree that neither of them nor any subcontractors, agents, assigns, or affiliated entities will disclose the contents of this Agreement except as required by applicable law or as necessary to carry out the terms of the Agreement or to enforce that Party's rights under this Agreement. The Vendor acknowledges that the State and its agencies are public entities and thus may be bound by South Dakota open meetings and open records laws. It is therefore not a breach of this Agreement for the State to take any action that the State reasonably believes is necessary to comply with South Dakota open records or open meetings laws.

Section II. Cyber Liability Insurance

The Vendor will maintain cyber liability insurance with liability limits in the amount of \$_____ to protect any and all State data the Vendor receives as part of the project covered by this agreement including State data that may reside on devices, including laptops and smart phones, utilized by Vendor employees, whether the device is owned by the employee or the Vendor. If the Vendor has a contract with a third-party to host any State data the Vendor receives as part of the project under this Agreement, then the Vendor will include a requirement for cyber liability insurance as part of the contract between the Vendor and the third-party hosting the data in question. The third-party cyber liability insurance coverage will include State Data that resides on devices, including laptops and smart phones, utilized by third-party employees, whether the device is owned by the employee or the third-party Vendor. The cyber liability insurance will cover expenses related to the management of a data breach incident, the investigation, recovery and restoration of lost data, data subject notification, call management, credit checking for data subjects, legal costs, and regulatory fines. Before beginning work under this Agreement, the Vendor will furnish the State with properly executed Certificates of Insurance which shall clearly evidence all insurance required in this Agreement and which provide that such insurance may not be canceled, except on 30 days prior written notice to the State. The Vendor will furnish copies of insurance policies if requested by the State. The insurance will stay in effect for three years after the work covered by this Agreement is completed.

Section III. Rejection or Ejection of Vendor

The State, at its option, may require the vetting of any of the Vendor, and the Vendor's subcontractors, agents, Assigns, or affiliated entities. The Vendor is required to assist in this process as needed.

The State reserves the right to reject any person from participating in the project or require the Vendor to remove from the project any person the State believes is detrimental to the project or is considered by the State to be a security risk. The State will provide the Vendor with notice of

its determination, and the reasons for the rejection or removal if requested by the Vendor. If the State signifies that a potential security violation exists with respect to the request, the Vendor must immediately remove the individual from the project.

Section IV. Non-Disclosure and Separation of Duties

The Vendor will enforce separation of job duties and require non-disclosure agreements of all staff that have or can have access to State Data or the hardware that State Data resides on. The Vendor will limit staff knowledge to those staff who duties that require them to have access to the State Data or the hardware the State Data resides on.

Section V. Cessation of Business

The Vendor will notify the State of impending cessation of its business or that of a tiered provider and the Vendor's contingency plan. This plan should include the immediate transfer of any previously escrowed assets and data and State access to the Vendor's facilities to remove or destroy any state-owned assets and data. The Vendor will implement its exit plan and take all necessary actions to ensure a smooth transition of service with minimal disruption to the State. The Vendor will provide a fully documented service description and perform and document a gap analysis by examining any differences between its services and those to be provided by its successor. The Vendor will also provide a full inventory and configuration of servers, routers, other hardware, and software involved in service delivery along with supporting documentation, indicating which if any of these are owned by or dedicated to the State. The Vendor will work closely with its successor to ensure a successful transition to the new equipment, with minimal downtime and impact on the State, all such work to be coordinated and performed in advance of the formal, final transition date.

Section VI. Legal Requests for Data

Except as otherwise expressly prohibited by law, the Vendor will:

- A. Immediately notify the State of any subpoenas, warrants, or other legal orders, demands or requests received by the Vendor seeking State Data maintained by the Vendor,
- B. Consult with the State regarding the Vendor's response,
- C. Cooperate with the State's requests in connection with efforts by the State to intervene and quash or modify the legal order, demand or request, and
- D. Upon the State's request, provide the State with a copy of both the demand or request and its proposed or actual response.

Section VII. eDiscovery

The Vendor will contact the State upon receipt of any electronic discovery, litigation holds, discovery searches, and expert testimonies related to, or which in any way might reasonably require access to State Data. The Vendor will not respond to service of process, and other legal requests related to the State without first notifying the State unless prohibited by law from providing such notice.

Section VIII. Audit Requirements

The Vendor warrants and agrees it is aware of and complies with all audit requirements relating to the classification of State Data the Vendor stores, processes, and accesses. Depending on the

data classification, this may require the Vendor to grant physical access to the data hosting facilities to the State or a federal agency. The Vendor will notify the State of any request for physical access to a facility that hosts or processes State Data by any entity other than the State.

Section IX. Annual Risk Assessment

The Vendor will conduct an annual risk assessment or when there has been a significant system change. The Vendor will provide verification to the State's contact upon request that the risk assessment has taken place. At a minimum, the risk assessment will include a review of the:

- A. Penetration testing of the Vendor's system;
- B. Security policies and procedures;
- C. Disaster recovery plan;
- D. Business Associate Agreements; and
- E. Inventory of physical systems, devices, and media that store or utilize ePHI for completeness.

If the risk assessment provides evidence of deficiencies, a risk management plan will be produced. Upon request by the State, the Vendor will send a summary of the risk management plan to the State's contact. The summary will include completion dates for the risk management plan's milestones. Upon request by the State, the Vendor will send updates on the risk management plan to the State's contact. Compliance with this Section may be met if the Vendor provides proof to the State that the Vendor is FedRAMP Certified and has maintained FedRAMP Certification.

Section X. Independent Audit

The Vendor will disclose any independent audits that are performed on any of the Vendor's systems tied to storing, accessing, and processing State Data. This information on an independent audit(s) must be provided to the State in any event, whether the audit or certification process is successfully completed or not. The Vendor will provide a copy of the findings of the audit(s) to the State. Compliance with this Section may be met if the Vendor provides a copy of the Vendor's SOC 2 Type II report to the State upon request.

Section XI. Access Attempts

The Vendor will log all access attempts, whether failed or successful, to any system connected to the hosted system which can access, read, alter, intercept, or otherwise impact the hosted system or its data or data integrity. For all systems, the log must include at least: login page used, username used, time and date stamp, incoming IP for each authentication attempt, and the authentication status, whether successful or not. Logs must be maintained not less than 7 years in a searchable database in an electronic format that is un-modifiable. At the request of the State, the Vendor agrees to grant the State access to those logs to demonstrate compliance with the terms of this Agreement and all audit requirements related to the hosted system.

Section XII. Access to State Data

Unless this Agreement is terminated, the State's access to State Data amassed pursuant to this Agreement will not be hindered if there is a:

- A. Contract dispute between the parties to this Agreement,
- B. There is a billing dispute between the parties to this Agreement, or

C. The Vendor merges with or is acquired by another company.

Section XIII. Provision of Data

State Data is any data produced or provided by the State as well as any data produced or provided for the State by the Vendor or a third-party.

Upon notice of termination by either party or upon reaching the end of the term of this Agreement, the Vendor will provide the State all current State Data in a non-proprietary format. In addition, the Vendor agrees to extract any information (such as metadata, which includes data structure descriptions, data dictionary, and data) stored in repositories not hosted on the State's IT infrastructure in a format chosen by the State. If the State's chosen format is not possible, the Vendor will extract the information into a text file format and provide it to the State.

Upon the effective date of the termination of this Agreement, the Vendor will again provide the State with all current State Data in a non-proprietary format. In addition, the Vendor will again extract any information (such as metadata) stored in repositories not hosted on the State's IT infrastructure in a format chosen by the State. As before, if the State's chosen format is not possible, the Vendor will extract the information into a text file format and provide it to the State.

Section XIV. Threat Notification

A credible security threat consists of the discovery of an exploit that a person considered an expert on Information Technology security believes could be used to breach any aspect of a system that is holding State Data or a product provided by the Vendor. Upon becoming aware of a credible security threat with the Vendor's product(s) and or service(s) being used by the State, the Vendor or any subcontractor supplying product(s) or service(s) to the Vendor needed to fulfill the terms of this Agreement will notify the State within two business days of any such threat. If the State requests, the Vendor will provide the State with information on the threat.

Section XV. Security Incident Notification for Non-Health Information

The Vendor will implement, maintain, and update Security Incident procedures that comply with all State standards and Federal and State requirements. A Security Incident is a violation of any BIT security or privacy policies or contract agreements involving sensitive information, or the imminent threat of a violation. The BIT security policies can be found in the Information Technology Security Policy ("ITSP") attached as BIT Attachment 1. The State requires notification of a Security Incident involving any of the State's sensitive data in the Vendor's possession. State Data is any data produced or provided by the State as well as any data produced or provided for the State by a third-party. The parties agree that, to the extent probes and reconnaissance scans common to the industry constitute Security Incidents, this Agreement constitutes notice by the Vendor of the ongoing existence and occurrence of such Security Incidents for which no additional notice to the State will be required. Probes and scans include, without limitation, pings and other broadcast attacks in the Vendor's firewall, port scans, and unsuccessful log-on attempts, if such probes and reconnaissance scans do not result in a Security Incident as defined above. Except as required by other legal requirements the Vendor will only provide notice of the incident to the State. The State will determine if notification to the public will be by the State or by the Vendor. The method and content of the notification of the affected parties will be coordinated with, and is subject to approval by the State, unless required otherwise by legal requirements. If the State decides that the Vendor will be distributing, broadcasting to or otherwise releasing information on

the Security Incident to the news media, the State will decide to whom the information will be sent, and the State must approve the content of any information on the Security Incident before it may be distributed, broadcast, or otherwise released. The Vendor must reimburse the State for any costs associated with the notification, distributing, broadcasting, or otherwise releasing information on the Security Incident.

- A. The Vendor must notify the State contact within 12 hours of the Vendor becoming aware that a Security Incident has occurred. If notification of a Security Incident to the State contact is delayed because it may impede a criminal investigation or jeopardize homeland or federal security, notification must be given to the State within 12 hours after law-enforcement provides permission for the release of information on the Security Incident.
- B. Notification of a Security Incident at a minimum is to consist of the nature of the data exposed, the time the incident occurred, and a general description of the circumstances of the incident. If all of the information is not available for the notification within the specified time period, the Vendor must provide the State with all of the available information along with the reason for the incomplete notification. A delay in excess of 12 hours is acceptable only if it is necessitated by other legal requirements.
- C. At the State's discretion within 12 hours the Vendor must provide to the State all data available including:
 - 1. name of and contact information for the Vendor's Point of Contact for the Security Incident,
 - 2. date and time of the Security Incident,
 - 3. date and time the Security Incident was discovered,
 - 4. description of the Security Incident including the data involved, being as specific as possible,
 - 5. the potential number of records, and if unknown the range of records,
 - 6. address where the Security Incident occurred, and
 - 7. the nature of the technologies involved. If not all of the information is available for the notification within the specified time period, the Vendor must provide the State with all of the available information along with the reason for the incomplete information. A delay in excess of 12 hours is acceptable only if it is necessitated by other legal requirements.
- D. If the Security Incident falls within the scope of South Dakota Codified Law Chapter 22-40, the Vendor is required to comply with South Dakota law.

The requirements of subsection D of this Section do not replace the requirements of subsections A, B, and C, but are in addition to them.

Section XVI. Handling of Security Incident for Non-Health Information

At the State's discretion, the Vendor will preserve all evidence regarding a security incident including but not limited to communications, documents, and logs. The Vendor will also:

- A. fully investigate the incident,
- B. cooperate fully with the State's investigation of, analysis of, and response to the incident,
- C. make a best effort to implement necessary remedial measures as soon as it is possible, and

- D. document responsive actions taken related to the Security Incident, including any post-incident review of events and actions taken to implement changes in business practices in providing the services covered by this Agreement.

If, at the State's discretion the Security Incident was due to the actions or inactions of the Vendor and at the Vendor's expense the Vendor will use a credit monitoring service, call center, forensics company, advisors, or public relations firm whose services are acceptable to the State. At the State's discretion the Vendor will offer two years of credit monitoring to each person whose data was compromised. The State will set the scope of any investigation. The State reserves the right to require the Vendor undergo a risk assessment where the State will determine the methodology and scope of the assessment and who will perform the assessment (a third-party vendor may be used). Any risk assessment required by this Section will be at the Vendor's expense.

If the Vendor is required by federal law or regulation to conduct a Security Incident or data breach investigation, the results of the investigation must be reported to the State within 12 hours of the investigation report being completed. If the Vendor is required by federal law or regulation to notify the affected parties, the State must also be notified, unless otherwise required by law.

Notwithstanding any other provision of this Agreement, and in addition to any other remedies available to the State under law or equity, the Vendor will reimburse the State in full for all costs incurred by the State in investigation and remediation of the Security Incident including, but not limited, to providing notification to regulatory agencies or other entities as required by law or contract. The Vendor will also pay all legal fees, audit costs, fines, and other fees imposed by regulatory agencies or contracting partners as a result of the Security Incident.

Section XVII. Security Incidents for Protected Health Information

Security Incident means the successful unauthorized access, use, disclosure, modification, or destruction of information or interference with system operations in an information system as defined in 45 CFR 164.304. The Vendor must alert the State contact within 12 hours of a Security Incident and provide daily updates to the BIT contact at their request. The Parties agree that this alert does not affect the Vendor's obligations under the Business Associate Agreement or the requirements of 45 CFR 164.410. The Parties agree that, to the extent probes and reconnaissance scans common to the industry constitute a Security Incident, this Agreement constitutes notice by the Vendor of the ongoing existence and occurrence of such Security Incidents for which no additional notice to the State will be required. Probes and scans include, without limitation, pings, and other broadcast attacks in the Vendor's firewall, port scans, and unsuccessful log-on attempts, if such probes and reconnaissance scans do not result in a Security Incident as defined above. The State can require the Vendor to conduct a review or investigation within the scope and methodology determined by the State. At the State's discretion, the review or investigation may be performed by a third party at the Vendor's expense.

Notwithstanding any other provision of this Agreement and in addition to any other remedies available to the State under law or equity, in the event the investigation or review determines that the Vendor is responsible for the Security Incident, and where the State incurs any costs in the investigation, review, or remediation of the Security Incident, the Vendor must reimburse the State in full for all such costs. Costs include, but are not limited to, providing notification to regulatory agencies or other entities as required by law or contract. In the event the investigation or review determines that the Vendor is responsible for the Security Incident, the Vendor must also pay all legal fees, audit costs, fines, and other fees imposed by regulatory agencies or contracting

partners as a result of the Security Incident, and all costs associated with the remediation of the Vendor's services or product(s).

Section XVIII. Adverse Event

The Vendor must notify the State contact within three days if the Vendor becomes aware that an Adverse Event has occurred. An Adverse Event is the unauthorized use of system privileges, unauthorized access to State Data, execution of malware, physical intrusions and electronic intrusions that may include network, applications, servers, workstations, and social engineering of staff. If the Adverse Event was the result of the Vendor's actions or inactions, the State can require a risk assessment of the Vendor the State mandating the methodology to be used as well as the scope. At the State's discretion a risk assessment may be performed by a third party at the Vendor's expense. State Data is any data produced or provided by the State as well as any data produced or provided for the State by a third-party.

Section XIX. Security Acknowledgment Form

The Vendor will be required to sign the Security Acknowledgement Form which is attached to this Agreement as BIT Attachment 2. The signed Security Acknowledgement Form must be submitted to the State and approved by the South Dakota Bureau of Information and Telecommunications and communicated to the Vendor by the State contact before work on the contract may begin. This Security Acknowledgment Form constitutes the agreement of the Vendor to be responsible and liable for ensuring that the Vendor, the Vendor's employee(s), and subcontractor's, agents, assigns and affiliated entities and all of their employee(s), participating in the work will abide by the terms of the Information Technology Security Policy (ITSP). Failure to abide by the requirements of the ITSP or the Security Acknowledgement Form can be considered a breach of this Agreement at the discretion of the State. It is also a breach of this Agreement, at the discretion of the State, if the Vendor does not sign another Security Acknowledgement Form covering any employee(s) and any subcontractor's, agent's, assign's, or affiliated entities' employee(s), any of whom are participating in the work covered by this Agreement, and who begin working under this Agreement after the project has begun. Any disciplining of the Vendor's, Vendor's employee(s), or subcontractor's, agent's, assign's, or affiliated entities' employee(s) due to a failure to abide by the terms of the Security Acknowledgement Form will be done at the discretion of the Vendor or subcontractors, agents, assigns, or affiliated entities and in accordance with the Vendor's or subcontractor's, agent's, assign's, and affiliated entities' personnel policies. Regardless of the actions taken by the Vendor and subcontractors, agents, assigns, and affiliated entities, the State will retain the right to require at the State's discretion the removal of the employee(s) from the project covered by this Agreement.

Section XX. Background Investigations

The State requires any person who writes or modifies State-owned software, alters hardware, configures software of State-owned technology resources, has access to source code or protected Personally Identifiable Information (PII) or other confidential information, or has access to secure areas to undergo fingerprint-based background investigations. These fingerprints will be used to check the criminal history records of both the State of South Dakota and the Federal Bureau of Investigation. These background investigations must be performed by the State with support from the State's law enforcement resources. The State will supply the fingerprint cards and prescribe the procedure to be used to process the fingerprint cards. Project plans should allow 2-4 weeks to complete this process.

If work assignments change after the initiation of the project covered by this Agreement so that a new person will be writing or modifying State-owned software, altering hardware, configuring software of State-owned technology resources, have access to source code or protected PII or other confidential information, or have access to secure areas, background investigations must be performed on the individual who will complete any of the referenced tasks. The State reserves the right to require the Vendor to prohibit any person from performing work under this Agreement whenever the State believes that having the person performing work under this Agreement is detrimental to the project or is considered by the State to be a security risk, based on the results of the background investigation. The State will provide the Vendor with notice of this determination.

Section XXI. Security

The Vendor must take all actions necessary to protect State information from exploits, inappropriate alterations, access or release, and malicious attacks.

By signing this Agreement, the Vendor warrants that:

- A. All Critical, High, Medium, and Low security issues are resolved. Critical, High, Medium, and Low can be described as follows:
 1. **Critical** - Exploitation of the vulnerability likely results in root-level compromise of servers or infrastructure devices.
 2. **High** - The vulnerability is difficult to exploit; however, it is possible for an expert in Information Technology. Exploitation could result in elevated privileges.
 3. **Medium** - Vulnerabilities that require the attacker to manipulate individual victims via social engineering tactics. Denial of service vulnerabilities that are difficult to set up.
 4. **Low** - Vulnerabilities identified by the State as needing to be resolved that are not Critical, High, or Medium issues.
- B. Assistance will be provided to the State by the Vendor in performing an investigation to determine the nature of any security issues that are discovered or are reasonably suspected after acceptance. The Vendor will fix or mitigate the risk based on the following schedule: Critical and high risk, within 7 days, medium risk within 14 days, low risk, within 30 days.

Section XXII. Data Location and Offshore Services

The Vendor must provide its services to the State as well as storage of State Data solely from data centers located in the continental United States. The Vendor will not provide access to State Data to any entity or person(s) located outside the continental United States that are not named in this Agreement without prior written permission from the State. This restriction also applies to disaster recovery; any disaster recovery plan must provide for data storage entirely within the continental United States.

Section XXIII. Vendor Training Requirements

The Vendor, Vendor's employee(s), and Vendor's subcontractors, agents, assigns, affiliated entities and their employee(s), must successfully complete, at the time of hire and annually thereafter, a cyber-security training program. The training must include but is not limited to:

- A. legal requirements for handling data,
- B. media sanitation,
- C. strong password protection,
- D. social engineering, or the psychological manipulation of persons into performing actions that are inconsistent with security practices or that cause the divulging of confidential information,
- E. security incident response, and
- F. Protected Health Information.

Section XXIV. Data Sanitization

At the end of the project covered by this Agreement the Vendor, and Vendor's subcontractors, agents, assigns, and affiliated entities will return the State Data or securely dispose of all State Data in all forms, this can include State Data on media such as paper, punched cards, magnetic tape, magnetic disks, solid state devices, or optical discs. This State Data must be permanently deleted by either purging the data or destroying the medium on which the State Data is found according to the methods given in the most current version of NIST 800-88. Certificates of Sanitization for Offsite Data (See bit.sd.gov/vendor/default.aspx for copy of certificate) must be completed by the Vendor and given to the State contact. The State will review the completed Certificates of Sanitization for Offsite Data. If the State is not satisfied by the data sanitization then the Vendor will use a process and procedure that does satisfy the State.

This contract clause remains in effect for as long as the Vendor, and Vendor's subcontractors, agents, assigns, and affiliated entities have the State data, even after the Agreement is terminated or the project is completed.

Section XXV. Banned Hardware and Software

The Vendor will not provide to the State any computer hardware or video surveillance hardware, or any components thereof, or any software that was manufactured, provided, or developed by a covered entity. As used in this paragraph, "covered entity" means the following entities and any subsidiary, affiliate, or successor entity and any entity that controls, is controlled by, or is under common control with such entity: Kaspersky Lab, Huawei Technologies Company, ZTE Corporation, Hytera Communications Corporation, Hangzhou Hikvision Digital Technology Company, Dahua Technology Company, Nuctech, or any entity that has been identified as owned or controlled by, or otherwise connected to, People's Republic of China. The Vendor will immediately notify the State if the Vendor becomes aware of credible information that any hardware, component, or software was manufactured, provided, or developed by a covered entity.

Section XXVI. Use of Portable Devices

The Vendor must prohibit its employees, agents, affiliates, and subcontractors from storing State Data on portable devices, including personal computers, except for devices that are used and kept only at the Vendor's data center(s). All portable devices used for storing State Data must be password protected and encrypted.

Section XXVII. Remote Access

The Vendor will prohibit its employees, agents, affiliates, and subcontractors from accessing State Data remotely except as necessary to provide the services under this Agreement and consistent with all contractual and legal requirements. The accounts used for remote access

cannot be shared accounts and must include multifactor authentication. If the State Data that is being remotely accessed is legally protected data or considered sensitive by the State, then:

- A. The device used must be password protected,
- B. The data is not put onto mobile media (such as flash drives),
- C. No non-electronic copies are made of the data, and
- D. A log must be maintained by the Vendor detailing the data which was accessed, when it was accessed, and by whom it was accessed.

The Vendor must follow the State's data sanitization standards, as outlined in this Agreement's Data Sanitization clause, when the remotely accessed data is no longer needed on the device used to access the data.

Section XXVIII. Data Encryption

If State Data will be remotely accessed or stored outside the State's IT infrastructure, the Vendor warrants that the data will be encrypted in transit (including via any web interface) and at rest at no less than AES256 level of encryption with at least SHA256 hashing.

Section XXIX. Rights, Use, and License of and to State Data

The parties agree that all rights, including all intellectual property rights, in and to State Data will remain the exclusive property of the State. The State grants the Vendor a limited, nonexclusive license to use the State Data solely for the purpose of performing its obligations under this Agreement. This Agreement does not give a party any rights, implied or otherwise, to the other's data, content, or intellectual property, except as expressly stated in the Agreement.

Protection of personal privacy and State Data must be an integral part of the business activities of the Vendor to ensure there is no inappropriate or unauthorized use of State Data at any time. To this end, the Vendor must safeguard the confidentiality, integrity, and availability of State Data and comply with the following conditions:

- A. The Vendor will implement and maintain appropriate administrative, technical, and organizational security measures to safeguard against unauthorized access, disclosure, use, or theft of Personally Identifiable Information (PII), data protected under the Family Educational Rights and Privacy Act (FERPA), Protected Health Information (PHI), Federal Tax Information (FTI), or any information that is confidential under applicable federal, state, or international law, rule, regulation, or ordinance. Such security measures will be in accordance with recognized industry practice and not less protective than the measures the Vendor applies to its own non-public data.
- B. The Vendor will not copy, disclose, retain, or use State Data for any purpose other than to fulfill its obligations under this Agreement.
- C. The Vendor will not use State Data for the Vendor's own benefit and will not engage in data mining of State Data or communications, whether through automated or manual means, except as specifically and expressly required by law or authorized in writing by the State through a State employee or officer specifically authorized to grant such use of State Data.

Section XXX. Third Party Hosting

If the Vendor has the State's data hosted by another party, the Vendor must provide the State the name of this party. The Vendor must provide the State with contact information for this third party and the location of their data center(s). The Vendor must receive from the third party written assurances that the State's data will always reside in the continental United States and provide these written assurances to the State. This restriction includes the data being viewed or accessed by the third-party's employees or contractors. If during the term of this Agreement the Vendor changes from the Vendor hosting the data to a third-party hosting the data or changes third-party hosting provider, the Vendor will provide the State with 180 days' advance notice of this change and at that time provide the State with the information required above.

Section XXXI. Securing of Data

All facilities used to store and process State Data will employ industry best practices, including appropriate administrative, physical, and technical safeguards to secure such data from unauthorized access, disclosure, alteration, and use. Such measures will be no less protective than those used to secure the Vendor's own data of a similar type, and in no event less than commercially reasonable in view of the type and nature of the data involved.

Section XXXII. Security Processes

The Vendor will disclose its non-proprietary security processes and technical limitations to the State such that adequate protection and flexibility can be attained between the State and the Vendor. For example: virus checking and port sniffing.

Section XXXIII. Import and Export of Data

The State will have the ability to import or export data piecemeal or in entirety at its discretion without interference from the Vendor. This includes the ability for the State to import or export data to/from other vendors.

Section XXXIV. Use of Production Data in a Non-Production Environment

The Vendor cannot use protected State Data, whether legally protected or protected by industry standards, in a non-production environment. Any non-production environment that is found to have legally protected production data, must be purged immediately and the State contact notified. The State will decide if this event is to be considered a security incident. "Legally protected production data" is any data protected under federal or state statute or regulation. "Industry standards" are data handling requirements specific to an industry. An example of data protected by industry standards is payment card industry information (PCI). Protected data that is de-identified, aggregated, or hashed is no longer considered to be legally protected.

Section XXXV. Banned Services

The Vendor warrants that any hardware or hardware components used to provide the services covered by this Agreement were not manufactured by Huawei Technologies Company, Nuctech, or ZTE Corporation, or any subsidiary or affiliate of such entities. Any company considered to be a security risk by the government of the United States under the International Emergency Economic Powers Act or in a United States appropriation bill will be included in this ban.

Section XXXVI. Multifactor Authentication for Hosted Systems

If the Vendor is hosting on their system or performing Software as a Service where there is the potential for the Vendor or the Vendor's subcontractor to see protected State Data, then Multifactor Authentication (MFA) must be used before this data can be accessed. The Vendor's MFA, at a minimum must adhere to the requirements of *Level 2 Authentication Assurance for MFA* as defined in NIST 800-63.
