These signs may mean someone is at risk for suicide. Risk is greater if a behavior is new or has increased and if it seems related to a painful event, loss or change.

1. Talking about or making plans for suicide
2. Expressing hopelessness about the future
3. Displaying severe/overwhelming emotional pain or distress
4. Showing worrisome behavioral cues or marked changes in behavior, particularly in the presence of the warning signs above. Specifically, this includes significant:

- Withdrawal from or changing in social connections/situations
- Changes in sleep (increased or decreased)
- Anger or hostility that seems out of character or out of context
- Recent increased agitation or irritability
