## SUBSTANCE USE PREVENTION SERVICES

### What is substance use prevention?

Substance use prevention places a focus on helping people develop the knowledge, attitude, and skills they need to make good choices about harmful behaviors of substance misuse or abuse. Each substance use prevention provider tailors prevention efforts around the needs of their community, using effective community-based, school-based and/or individual evidence-based programs.

School-based programming focuses on classroom presentations, early identification, screening and referral to services. Community-based programming focuses on establishing or changing community standards, policies and attitudes towards substance use. Individual-based programming focuses on targeted interventions to high risk individuals to reduce the likelihood of an individual developing a substance use disorder.

Substance use prevention has been proven to be effective and is one of the best investments we can make in our state's future - creating safe and healthy individuals, families, businesses and communities. Substance use prevention starts with you. Here are some things you can do to make a positive change in your home and community:

- Be a leader and positive role model at home;
- Talk to your children about substance use and teach your children healthy coping strategies;
- Identify the issues unique to your community;
- Get involved with a local prevention provider, community group, or your city government to employ strategies to prevent substance use;
- Strengthen or implement policies within your community, schools, organizations, and local businesses to create a healthy and safe environment;
- Advocate for prevention.

### South Dakota Prevention Resource Centers (PRCs)

Three Prevention Resource Centers provide regional support to students, parents, educators, community groups, community agencies, law enforcement and any other interested entities looking for prevention resource materials or support. Each PRC has a resource library with videos, DVDs, books, CDs, brochures and curricula available to the public for use. PRC staff are also able to provide training and education in the areas of prevention.

To access a PRC's resource library, request training or technical assistance, contact the PRC that serves your region:
