Substance Use Disorder Services

The Division of Behavioral health accredits and contracts with addiction treatment agencies across the state to provide quality services to both adults and youth. Services include screenings and assessments, early interventions, detoxification, outpatient and inpatient treatment services. Individuals who meet programmatic and financial eligibility guidelines, or who have considerable personal circumstances, may qualify for state funded services.

Early Intervention Services
Early intervention services offer outpatient services to individuals who may have substance use related problems, but are not diagnosed with a substance use disorder.

Outpatient Treatment Services
Outpatient treatment services provide counseling services to individuals diagnosed with substance use disorders.

Low Intensity Residential Treatment Services
Low intensity residential treatment services include residential, peer-oriented treatment programs for individuals with substance use disorders whose living situation or recovery environment is incompatible with recovery goals. To prepare the client to live successfully in the community, the program provides substance use disorder counseling along with case management services.

Inpatient Treatment Services
Inpatient treatment services provide residential treatment with medically monitored intensive treatment for individuals with severe substance use disorders.

Detoxification Treatment Services
Detoxification treatment services are residential treatment services delivered by trained staff who provide 24-hour supervision, observation and support for individuals who are intoxicated or experiencing withdrawal symptoms. The goal is to motivate the individual to seek further treatment services.

Contact Us
